DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of Final Environmental Impact Statement for Proposed Issuance of a Permit to Allow Incidental Take of Golden-cheeked Warbler, Black-capped Vireo, and Six Karst Invertebrates in Travis County, Texas

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Availability of a Final Environmental Impact Statement (EIS) for the proposed issuance of a section 10(a)(1)(B) permit to allow the

incidental take of golden-cheeked warblers, black-capped vireos, and six karst invertebrates for land development on private lands in Travis County, Texas.

SUMMARY: The City of Austin and Travis County have applied for a permit from the U.S. Fish and Wildlife Service to allow for incidental take of Federally listed endangered species black-capped vireo, golden-cheeked warbler, and six karst invertebrates under section 10(a)(1)(B) of the Endangered Species Act. This will be incidental to otherwise lawful activities that would occur as a result of clearing of vegetation and grading or other earth-moving activities necessary for residential, commercial, and industrial construction and infrastructure projects within Travis County, Texas.

The proposed permit will allow approved incidental take outside of proposed preserve lands within the proposed permit boundaries. In general, this area includes all of the lands within Travis County, excluding that portion of Balcones Canyonlands National Wildlife Refuge that falls within Travis County, and the city limits and planning jurisdictions of municipalities not participating in the Balcones Canyonlands Conservation Plan. The permit period is 30 years. Potential development for this time period is estimated to affect between 30,000 and 60,000 acres within the permit area. Of the approximately 2,000 acres of known occupied black-capped vireo habitat located within Travis County, 933 acres

will be preserved within the Conservation Plan area and approximately 1,000 acres will be subject to incidental take in the permit area. For the golden-cheeked warbler, approximately 26,753 acres of potential habitat is located within the permit area and may be subject to incidental take. This potential warbler habitat could support from 1,605 to 3,210 pairs of warblers. Of the 45,368 acres of potential karst invertebrate habitat occurring in the permit area, approximately 38,349 acres will be unprotected by the proposed Conservation Plan.

To minimize and mitigate the impacts of take, the applicants propose to conserve a minimum of 30,428 acres of black-capped vireo and golden-cheeked warbler habitat in a preserve system; provide for the ongoing maintenance, patrol, and biological management of the conserved habitat; conduct the biological monitoring and research activities in support of the Conservation Plan; and provide funds to implement the habitat Conservation Plan. Alternatives considered include no action; issuance of the permit with the submitted Balcones Canyonlands Conservation Plan and a 30,428 acre preserve; and issuance of the permit with the submitted Balcones Canyonlands Conservation Plan and a 35,428 acre preserve.

DATES: Comments will be accepted until April 22, 1996.

ADDRESSES: Comments should be sent to the U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200; Austin Texas 78758.
