

burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. BLM will receive and analyze any comments sent in response to this notice and include them with its request for approval from the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

BLM manages and sells timber located on the revested Oregon and California Railroad and the reconveyed Coos Bay Wagon Road Grant Lands pursuant to authority of the Act of August 28, 1937, (50 Stat. 875, 43 U.S.C. 1181e). BLM manages and sells timber located on other lands under the jurisdiction of the BLM pursuant to the Act of July 31, 1947, as amended (61 Stat. 681, 30 U.S.C. 601 *et seq.*). The implementing regulations are found at 43 CFR 5400, Sales of Forest Products; General. The regulations were issued on June 13, 1970 (35 FR 9785), amended on March 8, 1973 (38 FR 6280), September 2, 1982 (47 FR 38696), and last amended on July 17, 1987 (52 FR 26983). A bidder or purchaser for the sale of timber must be (1) an individual who is a citizen of the United States, (2) a partnership composed wholly of such citizens, (3) an unincorporated association composed wholly of such citizens, or (4) a corporation authorized to transact business in the States in which the timber is located (43 CFR 5441.1). BLM collects the purchaser's name and address, tract number, sale name, sale notice date, BLM District, evidence of qualification, bid deposit type and amount, product type or timber species, unit, estimated volume or quantity, unit price and total value using BLM Form 5440-9, Deposit and Bid for Timber.

BLM uses the information to determine that a prospective purchaser has met the regulatory requirements to qualify for bidding and that the bid offered meets the minimum acceptable amount. If BLM did not collect this information, unqualified prospective purchasers might enter into the timber sale contracting process and the bidding process may be compromised.

Based on BLM's experience administering timber sales, the public reporting burden for the information collected is estimated to average one and one quarter hours per response. This includes time to read and understand the instructions, consult the timber sale prospectus, make a determination of the value of the products and fill out the form. The respondents are prospective timber purchasers. The frequency of response

is controlled by the number of advertised sales conducted. The number of responses is estimated to be 500 from experience with the number of bidders qualifying for timber sales over the past 3 years. The estimated total annual burden on respondents is about 625 hours.

Any interested member of the public may request and obtain, without charge, a copy of Form 5440-9 by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will also become a matter of public record.

Dated: March 20, 1996.

Dr. Annetta L. Cheek,
Chief, Regulatory Management Team.

BILLING CODE 4310-70-P

Bureau of Reclamation

[FES 96-14]

**Tongue River Basin Project/Northern
Cheyenne Indian Reserved Water
Rights Settlement Act of 1992, Big
Horn County, Montana**

AGENCY: Bureau of Reclamation
(Interior), in conjunction with the
Northern Cheyenne Tribe and the
Montana Department of Natural
Resources and Conservation.

ACTION: Notice of Availability of Final
Environmental Impact Statement (FEIS).

SUMMARY: Pursuant to section 102(2)(C)
of the National Environmental Policy

Act of 1969, as amended, the Bureau of
Reclamation, acting as lead Federal
agency, in conjunction with the
Northern Cheyenne Tribe and the
Montana Department of Natural
Resources and Conservation, has
prepared a Final Environmental Impact
Statement on the Tongue River Basin
Project portion of the Northern
Cheyenne Indian Reserved Water Rights
Settlement Act of 1992 (Settlement Act).
The proposed action affects the
following trust assets of the Northern
Cheyenne Indian Tribe (Tribe) (1) the
Tribe's existing water supplies held in
Tongue River Reservoir; (2) the safety of
downstream Tribal lands; and (3)
additional water for the Tribe's use in
the Tongue River Basin. The FEIS
evaluates the impact to the environment
of various alternatives for protecting
these Tribal assets. The project includes
the repair and enlargement of the
Tongue River Dam, the partial
fulfillment of the Northern Cheyenne
Settlement Act, and the conservation,
development, and enhancement of fish
and wildlife resources and habitat in the
Tongue River Basin.

FOR FURTHER INFORMATION CONTACT: Ms.
Katherine Jabs, Area Manager, Montana
Projects Office, Bureau of Reclamation
(Code: MT-100), P.O. Box 30137,
Billings, Montana 59107, telephone:
(406) 247-7298.

SUPPLEMENTARY INFORMATION:

Negotiations between the Federal
Government (acting as trustee for the
Tribe) and the State of Montana
culminated in 1991 with the signing of
a water rights compact. Subsequently,
the compact was ratified by the United
States Congress and the Northern
Cheyenne Indian Water Rights
Settlement Act of 1992 (Settlement Act)
was signed into Public Law #102-374.
During the negotiations, an opportunity
was identified to rehabilitate the
presently unsafe State-owned Tongue
River Dam (Dam) and provide
additional water to the Tribe by raising
the dam. The following action
alternatives for rehabilitating and
replacing the spillway and raising the
Dam crest elevation 4 feet were
evaluated in the FEIS: (1) A Labyrinth
Weir Spillway, (2) a Roller-Compacted
Concrete (RCC) Spillway, and (3) No
Action. Other alternatives were
considered and dismissed on the basis
of being technically or economically
infeasible or resulted in greater
environmental effects. These dismissed
alternatives ranged from purchasing
water rights to satisfy the Settlement Act
to constructing a new dam at another
location. The preferred alternative
