#### SUPPLEMENTARY INFORMATION:

##### A. Background

States authorized under section 3006(b) of the Resource Conservation and Recovery Act ("RCRA or the Act"), 42 U.S.C. 6926(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. Revisions to State hazardous waste programs are necessary when

Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 124, 260-268, and 270.

##### B. Louisiana

Louisiana initially received final authorization on February 7, 1985 (see 50 FR 3348), to implement its base hazardous waste management program. Louisiana received authorization for revisions to its program on January 29, 1990 (see 54 FR 48889), October 25, 1991 (see 56 FR 41958), and Corrections at (56 FR 51762), effective January 23, 1995 (see 59 FR 55368-55371), and Corrections at (see 60 FR 18360), March 8, 1995 (see 59 FR 66200) and January 2, 1996 (see 60 FR 53707). On December 11, 1995, Louisiana submitted a final complete program revision application for additional program approvals. Today, Louisiana is seeking approval of its program revision in accordance with 40 CFR 271.21(b)(3).

In 1983, the Louisiana legislature adopted Act 97, which amended and reenacted Louisiana Revised Statutes 30:1051 et seq., the Environmental Affairs Act. This Act created the Louisiana Department of Environmental Quality (LDEQ), which has lead agency jurisdictional authority for administering the RCRA Subtitle C program in the State.

EPA reviewed Louisiana's application and made an immediate final decision that Louisiana's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant authorization for the additional program modifications to Louisiana. The public may submit written comments on EPA's proposed final decision until May 12, 1996. Copies of LDEQ's application for program revision are available for inspection and copying at the locations indicated in the **ADDRESSES** section of this document.

Approval of LDEQ's program revision shall become effective 75 days from the date this notice is published, unless an adverse written comment pertaining to the State's revision discussed in this notice is received by the end of the comment period. If an adverse written comment is received, EPA will publish either (1) a withdrawal of the immediate final decision or (2) a notice containing a response to the comment which either affirms that the immediate final decision takes effect or reverses the decision.

Louisiana's program revision application includes State regulatory
