

procure the commodities and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities. I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodities and services.

3. The action will result in authorizing small entities to furnish the commodities and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodities and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

**BILLING CODE 3710-06-M**

**Availability of Draft Master Plan and Supplement to the Environmental Impact Statement for the Lake Seminole Hydrilla Action Plan, Florida-Georgia-Alabama**

**AGENCY:** U.S. Army Corps of Engineers, DOD.

**ACTION:** Notice of availability.

**SUMMARY:** The Mobile District, U.S. Army Corps of Engineers has completed a draft report disclosing the environmental, engineering, and economic aspects of numerous hydrilla management options for Lake Seminole, Florida-Georgia-Alabama. The comment period for this draft document ends on May 28, 1996.

**FOR FURTHER INFORMATION CONTACT:**

For more information on this draft document, please contact Mr. Michael J. Eubanks, U.S. Army Engineer District, Mobile, ATTN: CESAM-PD-EI, P.O. Box 2288, Mobile, AL 36628-0001, (telephone (334) 694-3861 or 1-800-421-7637).

**SUPPLEMENTARY INFORMATION:** Hydrilla, a non-native submersed aquatic plant, is causing significant water resource use problems on Lake Seminole, a 37,500 acre Corps reservoir. Hydrilla increased from 1 acre in 1967 to a maximum of 24,000 in 1992. The current (1995) acreage has been reduced to 18,200 acres as a result of repeated herbicidal treatments and significant flooding during 1994. Numerous hydrilla management options have been used in the past on Lake Seminole, with herbicidal applications having been the most effective technique demonstrated to date. Alternatives discussed in this evaluation include: no action (no hydrilla control); mechanical control (harvesters); biological control with insects or plant pathogens; sterile grass carp (confined and unconfined options); lake drawdown; traditional herbicide program; herbicide drip delivery system; and, combinations of these alternatives (integrated hydrilla management). An integrated hydrilla management alternative, with components from the confined grass carp, herbicide drip delivery system, and a reduced traditional herbicide program is the draft recommended plan. The average annual cost for this plan is \$566,546; is economically justified based on recreation benefits; and results in control of hydrilla at the priority hydrilla management areas and would significantly reduce the total hydrilla acreage to from the maximum hydrilla
