Clean Air Act; Acid Rain Provisions

AGENCY: Environmental Protection Agency.

ACTION: Notice of the 1996 EPA SO₂ allowance auctions results.

SUMMARY: Pursuant to Title IV of the Clean Air Act and 40 CFR Part 73, the EPA is responsible for implementing a program to reduce emissions of sulfur dioxide (SO₂), a precursor of acid rain. The centerpiece of the SO₂ control program is the allocation of transferable allowances, or authorizations to emit SO₂, which are distributed in limited quantities to existing utility units and which eventually must be held by virtually all utility units to cover their SO₂ emissions. These allowances may be transferred among polluting sources and others, so that market forces may

govern their ultimate use and distribution, resulting in the most cost-effective sharing of the emissions control burden. EPA is directed under Section 416 of the Act to conduct annual sales and auctions of a small portion of allowances (2.8%) withheld from the total allowances allocated to utilities each year. Sales and auctions are expected to stimulate and support the allowance market and to provide a public source of allowances, particularly to new units for which no allowances are allocated. In the Fall of 1992, EPA delegated the administration of the EPA allowance auctions and sales to the Chicago Board of Trade (CBOT). Today, the Acid Rain Division is giving notice of the results of the fourth annual SO₂ allowance auctions that were conducted by the CBOT on March 25, 1996.

For rules governing the conduct of the auctions and sales see 40 CFR Part 73, Subpart E.

I. Offers

A. Total Allowances Available for Auction

In the spot auction (year 1996 allowances sold), a total of 158,000 allowances were offered for sale: 150,000 that were withheld from the utilities and an additional 8,000 that were voluntarily contributed from utilities. In the 6-year advance auction (year 2002 allowances sold), a total of 32,000 allowances were offered for sale: 25,000 that were unsold from the 1995 direct sale and an additional 7,000 that were contributed from utilities. In the 7-year advance auction (year 2003 allowances sold), a total of 107,000 allowances were offered for sale: 100,000 that were withheld from the utilities and an additional 7,000 that were contributed. The minimum prices that utilities would accept for their contributed allowances are listed in Table 1.

III. Electronic Access

The Pesticide Data Submitters List is available on EPA's gopher server and two other pathways on the Internet. The Internet address of EPA's gopher server is gopher://gopher.epa.gov. This information also is available using file transfer protocol (ftp) on ftp.epa.gov or using the world wide web (www) Internet address on http://www.epa.gov.

The Pesticide Data Submitters List is also available on the Pesticides Special Review and Reregistration Information System Bulletin Board System. This Bulletin Board System (BBS) is a computer set up to accept calls from over a telephone line and allow callers to use the computer. Anyone with a computer or terminal connected to a phone line or networked to one can dial into the BBS and perform the functions it is set up to allow.

The telephone number of this bulletin board is (703) 308-7224. To connect to this or any other BBS, several parameters in your communication software must be set appropriately. The settings for this BBS are the standard settings for most: 8 data bits, no parity, and 1 stop bit (abbreviated as 8N1). Communication speeds from 2400 bps to 28.8K bps are available, accommodating almost all speeds available in modems on the market today. The system displays color ANSI graphics as well as ASCII text.

IV. From the Internet

The Pesticide Special Review and Reregistration Information System can be accessed via GSA's Fedworld system.

Telnet or ftp to fedworld.gov and follow the onscreen instructions to get to the gateway.

V. From a LAN

Many Local Area Networks (LANs) are connected to the telephone network. While it is not possible to address the multitude of possible configurations here, your network administrator will be able to tell you if you are able to dial out to other systems from your LAN and what specific software you have available to do this.
