

and New Inert Ingredients (OMB Control No. 2070-0024; EPA ICR No. 0597.06). This is a request to extend a currently approved information collection which expires on May 31, 1996.

Abstract: The use of pesticides on crops often results in pesticide residues in or on the crop. To protect the public health from unsafe pesticide residues, EPA sets limits, formerly known as tolerances, on the nature and level of residues permitted. EPA is mandated under the Federal, Food, Drug, and Cosmetic Act (FFDCA), as amended, to ensure that the maximum residue levels likely to be found in or on food/feed are safe for human consumption through a careful review and evaluation of residue chemistry and toxicology data. In addition, EPA must ensure that adequate enforcement of the MRL can be achieved through the testing of submitted analytical methods. EPA will establish an MRL or grant an exemption from the requirement of an MRL once the data reviewed is deemed adequate. This information collection is a one time request and is mandatory for the registration of a pesticide product used on food/feed crops. The regulations that include the information requirements are found in FFDCA Sections 402, 406, 408, and 409, and in 40 CFR Part 180.

Respondents/Affected Entities: Registrants of pesticide products which are used on food/feed crops.

Estimated No. of Respondents: 150.
Estimated Annual Burden Per Respondent: 1,442 hours.

Estimated Total Annual Burden on Respondents: 216,300 hours.

Frequency of Collection: Once per event.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 1,442 hours per response. This estimate includes the time needed to review regulations; conduct field trials; prepare petitions, read notices and comply with EPA correspondences; prepare responses, and maintain information. No person is required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are published in the Federal Register with the final rule and are codified in 40 CFR Part 9 for subsequent display.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to the following addresses. Please refer to EPA ICR No. 0597.06 and OMB Control No. 2070-0024 in any correspondence.

Abstract: EPA's Office of Solid Waste is conducting The National Hazardous Waste Constituent Survey which is a voluntary survey designed to collect

information on the presence and concentration of chemical constituents, particularly metals and organics, in hazardous waste management facilities' waste streams. The information collected through this survey will provide valuable information for future Resource Conservation and Recovery Act (RCRA) regulatory initiatives, such as the Hazardous Waste Identification Rule (HWIR) Process Waste rulemaking. RCRA as amended by the Hazardous and Solid Waste Amendments (HSWA) requires EPA to establish a national regulatory program to ensure that hazardous waste is managed in a manner protective of human health and the environment. EPA is authorized under sections 2002 and 3007 of RCRA to collect information from industry and other parties when necessary to carry out its regulatory responsibilities. Executive Order No. 12866 requires that all administrative decisions be based on adequate information concerning the need for and consequences of proposed government action. Executive Order 12866 requires the preparation and evaluation of an Assessment of Costs and Benefits for all proposed regulatory action determined to be significant.
