

Under section 4241(d) of title 18, the initial period of hospitalization for an incompetent accused shall not exceed four months. However, in determining whether there is a substantial probability the accused will attain the capacity to permit the trial to proceed in the foreseeable future, the accused may be hospitalized for an additional reasonable period of time.

This additional period of time ends either when the accused's mental condition is improved so that trial may proceed, or when the pending charges against the accused are dismissed. If charges are dismissed solely due to the accused's mental condition, the accused is subject to hospitalization as provided in section 4241 of title 18.

The analysis accompanying R.C.M. 909 is amended by inserting the following at the end thereof:

*1996 Amendment:* The rule was changed to provide for the hospitalization of an incompetent accused after the enactment of Article 76b, UCMJ, in the National Defense Authorization Act for Fiscal Year 1996, Pub. L. No. 104-106 (1996).

**DEPARTMENT OF ENERGY**

**Office of Energy Efficiency and Renewable Energy**

[Case No. CW-004]

**Energy Conservation Program for Consumer Products: Granting of the Application for Interim Waiver and Publishing of the Petition for Waiver of General Electric Appliances From the DOE Clothes Washer Test Procedure**

**AGENCY:** Office of Energy Efficiency and Renewable Energy, Department of Energy.

**ACTION:** Notice.

**SUMMARY:** Today's notice grants an Interim Waiver to General Electric Appliances (GEA) and publishes GEA's Petition for Waiver from the existing Department of Energy (DOE or Department) clothes washer test procedure regarding wash temperature selections and automatic water fill capability for its clothes washer model WZSE5310 (Monogram brand).

GEA seeks a waiver because its clothes washer model WZSE5310 has the following design features that differ from those covered by the existing DOE clothes washer test procedures: five wash temperatures (a cold, three warm and a hot) in a primary mode (factory preset), 34 wash temperatures in a secondary programming mode (i.e., a customizing feature), and a consumer selectable manual or automatic water fill capability. GEA seeks to test wash temperature selections by averaging the three warm wash temperatures (warm-hot/cold, warm/cold and warm-cold/cold) in the primary mode and then applying the existing test procedure

Temperature Use Factors (TUFs) for a three temperature machine (hot/cold, warm/cold and cold/cold). In regard to consumer selectable water fill capability, GEA proposes to use the existing test procedure manual fill provision. DOE is soliciting comments and information regarding the Petition for Waiver.

**DATES:** DOE will accept comments, data, and information not later than May 24, 1996.

**ADDRESSES:** Written comments and statements shall be sent to: Department of Energy, Office of Energy Efficiency and Renewable Energy, Case No. CW-004, Mail Stop EE-431, Room 1J-018, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, 20585-0121 (202) 586-7140.

**FOR FURTHER INFORMATION CONTACT:** P. Marc LaFrance, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Mail Station EE-431, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585-0121, (202) 586-8423

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC-72, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585-0103, (202) 586-9507.

**SUPPLEMENTARY INFORMATION:** The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act, as amended (EPCA), 42 USC 6291 et seq., which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including clothes washers. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at Title 10 CFR Part 430, Subpart B.

DOE amended the test procedure rules to provide for a waiver process by adding § 430.27 to Title 10, CFR Part 430. (45 FR 64108, September 26, 1980). Thereafter, DOE further amended the appliance test procedure waiver process to allow the Assistant Secretary for Energy Efficiency and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver from such prescribed test procedures. (51 FR 42823, November 26, 1986).

The waiver process allows the Assistant Secretary to temporarily waive the test procedures for a particular basic
