

Agency Information Collection Activities: Submission for Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission: Revision.
2. The title of the information collection: NRC Form 313, "Application for Material License."
3. The form number: NRC Form 313.
4. How often the collection is required: There is a one-time submittal of information to receive a license. Once a specific license has been issued, there is a 5-year resubmittal of the information for renewal of the license.
5. Who will be required or asked to report: All applicants requesting a license for byproduct or source material.
6. An estimate of the number of responses: 2,669 licensing actions for NRC licensees and 6,922 licensing actions for Agreement State licensees. The NRC has published a final rule, "One-Time Extension of Certain Byproduct, Source, and Special Nuclear Materials Licenses" on January 16, 1996, with an effective date of February 15, 1996. This rule implements, on a one-time basis, a 5-year extension of certain byproduct, source, and special nuclear materials licenses. It is expected that approximately 80 percent of NRC licenses will qualify for the one time extension. An 80 percent reduction in the number of anticipated renewals during the OMB clearance period was used in calculating the burdens.

7. The estimated number of annual respondents: Approximately 6,200 NRC licensees and 12,400 Agreement State licensees. This is the total number of licensees which could potentially submit licensing actions.

8. An estimate of the total number of hours needed annually to complete the requirement or request: 18,683 hours for NRC licensees and 48,454 hours for Agreement State licensees (7 hours per response).

9. An indication of whether Section 3507(d), Pub. L. 104-13 applies: Not applicable.

10. Abstract: Applicants must submit NRC Form 313 to obtain a specific license to possess, use, or distribute byproduct or source material. The information is reviewed by the NRC to determine whether the applicant is qualified by training and experience, and has equipment, facilities, and procedures which are adequate to protect the public health and safety of the public, and minimize danger to life or property.

Agency Information Collection Activities: Submission for Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission: Revision.
2. The title of the information collection: 10 CFR Part 31, "General Domestic Licenses for Byproduct Material"
3. The form number: Not applicable.
4. How often the collection is required: Reports are submitted as events occur. Registration certificates may be submitted at any time. Changes to the information on the registration certificate are submitted as they occur.
5. Who will be required or asked to report: Persons receiving, possessing, using, or transferring byproduct material in certain items.
6. An estimate of the number of responses: 170 reports from NRC licensees and 340 reports from Agreement State licensees.
7. The estimated number of annual respondents: Approximately 10,126 NRC general licensees and 20,252 Agreement State general licensees.
8. An estimate of the total number of hours needed annually to complete the requirement or request: 2,634 hours for NRC licensees and 5,265 hours for Agreement State licensees.
9. An indication of whether Section 3507(d), Public Law 104-13 applies: Not applicable.

10. Abstract: 10 CFR Part 31 establishes general licenses for the possession and use of byproduct material in certain items and a general license for ownership of byproduct material. General licensees are required to keep records and submit reports identified in Part 31 in order for NRC to determine with reasonable assurance that devices are operated safely and without radiological hazard to users or the public. The revision reflects an overall increase in burden. There has been a decrease in burden for NRC licensees, due to a smaller number of general licensees and fewer reports being filed by general licensees. However, the burden for Agreement State licensees was not included in the previous burden.
