#### **Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Storm Damage Reduction and Beach Erosion Control Project on Brigantine Island, Atlantic County, NJ**

**AGENCY:** U.S. Army Corps of Engineers, DoD.

**ACTION:** Notice of intent.

**SUMMARY:** The action being taken is an evaluation of the alternatives for storm damage reduction and the control of further erosion on Brigantine Island, New Jersey. The purpose of any consequent work would be to provide shore property protection and to stabilize the shoreline at the predetermined width.

**FOR FURTHER INFORMATION CONTACT:** Questions regarding the DEIS should be addressed to Ms. Beth Brandreth, (215) 656-6558, U.S. Army Corps of Engineers, CENAP-PL-E, Wanamaker Building, 100 Penn Square East, Philadelphia, Pennsylvania 19107-3390.

#### **SUPPLEMENTARY INFORMATION:**

##### **1. Proposed Action**

a. The draft document evaluates a study area approximately 7 miles in length, extending from Brigantine Inlet to Absecon Inlet. The study area encompasses Brigantine Island, which contains the City of Brigantine and the North Brigantine State Nature Area. The

beaches along this island have been subject to erosion by storms, tidal inundation, and wave action. One potential offshore sand borrow source, located in the vicinity of Brigantine Inlet, will be investigated in this study.

b. The authorities for the proposed project are the resolutions adopted by the Committee on Public Works and Transportation of the U.S. House of Representatives and the Committee on Environmental and Public Works of the U.S. Senate in December 1987.

##### **2. Alternatives**

In addition to the no action alternative, the alternatives considered for storm damage reduction and erosion control will fall into structural and non-structural categories. The structural measures to correct the beach erosion include bulkheads, seawalls, revetments, offshore breakwaters, groins, beach nourishment, perched beach, submerged reef with beachfill, and offshore submerged feeder berms. Non-structural measures include flood insurance, developmental regulations, and evacuation.

##### **3. Scoping**

a. Numerous studies and reports addressing beach erosion along the New Jersey Coast were conducted by the Corps of Engineers. The most recent study for this area is a Reconnaissance Report: Brigantine Inlet to Great Egg Harbor Inlet Reconnaissance Study (February 1992), which identified a number of problem areas where erosion was negatively impacting the adjacent shorelines. This study identified Brigantine Island as one of the primary areas to be recommended for further study in the feasibility phase.

b. The scoping process is on-going and has involved preliminary coordination with Federal, State, and local agencies. Participation of the general public and other interested parties and organizations will be invited by means of a public notice.

c. The significant issues and concerns that have been identified include the impacts of the project on aquatic biota, water quality, intertidal habitat, shallow water habitat, and cultural resources.

##### **4. Availability**

It is estimated that the DEIS will be made available to the public in October 1997.
