

Jefferson Davis Highway, Arlington, VA (703)-308-8034.

SUPPLEMENTARY INFORMATION: In a Federal Register Notice of September 21, 1994 (59 FR 48430), EPA announced its intent to cancel the registrations of certain pesticide products (Vaporooter A Foaming Fumigant (EPA Reg. No. 9993-1), Foam Coat Vaporooter (EPA Reg. No. 9993-2) and Sanafoam Vaporooter II (EPA Reg. No. 9993-3)) held by Airrigation Engineering Company of Pleasanton, CA. The Agency took this action because Airrigation Engineering Company failed to comply with the Agency's decision to classify the products as restricted use pesticides.

Under FIFRA section 3(d)(1)(C), the Administrator may classify a pesticide for restricted use if she determines that the pesticide, when applied in accordance with the directions for use, warnings and cautions, or, in accordance with widespread and commonly recognized practice, may generally cause unreasonable adverse effects on the environment, unless additional regulatory restrictions are employed. Once classified for restricted use, a product can be applied only by or under the direct supervision of a certified applicator (FIFRA sections 3(d)(1)(C), 12(a)(2)(F), 12(a)(2)(G)).

EPA has published regulations that establish procedures that EPA will follow when classifying a product for restricted use. Under 40 CFR 152.165(c)(2), the Agency may notify a registrant that it has decided to classify a pesticide as restricted use and require the registrant to submit certain information to comply with the classification decision. If a registrant fails to comply with this notification, the Agency may initiate cancellation proceedings.

The Agency determined that restricted use classification for the use of metam-sodium products in sewers is required because of the elaborate and complicated methods of applying this pesticide and the potential for harmful exposure. The basis for the Agency's determination is given in the September 21, 1994 Notice of Intent to Cancel. The Airrigation Engineering Company products identified above are metam-sodium products used in sewers that are subject to this classification determination. On September 24, 1993, EPA notified Airrigation Engineering Company of its classification decision. Airrigation Engineering Company refused to comply with the Agency's requirement that the metam-sodium products be classified as restricted use. Because the only measure short of

cancellation that would reduce the risks posed by these products to an acceptable level was the restricted use classification and because the registrant would not voluntarily change the classification of its products, the Agency initiated cancellation proceedings.

The September 21, 1994 Notice of Intent to Cancel announced that cancellation could be avoided by amending the registrations of the products identified above to change their classification to restricted use; the change in classification for the Airrigation Engineering Company products would become effective at the same time as the change in classification of similar products whose registrants had already agreed to the restricted use classification. Alternatively, Airrigation Engineering Company could request an evidentiary hearing on the Agency's cancellation decision. Procedures for requesting a hearing were given in the September 21, 1994 Notice.

On November 7, 1994, Airrigation Engineering Company submitted a timely and effective hearing request. During the course of the pre-hearing proceedings, the registrant decided to comply with the Agency's classification decision.

On March 1, 1996, the Agency approved label amendments for the products identified above to change their classification to restricted use.

This Notice announces that Airrigation Engineering Company has complied with the Agency's decision to classify the products identified above as restricted use products. Because Airrigation Engineering Company took the steps to avoid cancellation which were identified in the September 21, 1994 Notice, EPA is withdrawing its Notice of Intent to Cancel the product registrations identified above.

Dated: May 9, 1996.

Daniel M. Barolo,
Director, Office of Pesticide Programs.

BILLING CODE 6560-50-F

[OPP-30410; FRL-5367-6]

Woodstream Corporation; Applications to Register Pesticide Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing new active ingredients not included in any

previously registered products pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATES: Written comments must be submitted by June 17, 1996.

ADDRESSES: By mail, submit written comments identified by the document control number [OPP-30410] and the file symbols (47629-R and 47629-E) to: Public Response and Program Resources Branch, Field Operations Divisions (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Environmental Protection Agency, Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will be accepted on disks in Wordperfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP-30410]. No "Confidential Business Information" (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submission can be found below in this document.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Rita Kumar, Biopesticides and Pollution Prevention Division (7501W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. CS51B6, Westfield Building North Tower, 2800 Crystal Drive, Arlington, VA 22202, (703) 308-8291; e-mail: kumar.rita@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: EPA received applications from Woodstream Corporation, 69 N. Locust St., Lititz, PA 17543-0327, to register the pesticide products Victor Roach Bait Stations 1 and Victor Roach Bait Stations 2 (EPA File Symbols 47629-R and 47629-E), containing the active ingredient German cockroach pheromone at 0.004 percent for both products, an active ingredient not included in any previously registered products pursuant to the provisions of section 3(c)(4) of FIFRA. These products are formulated with boric acid and are proposed for use to kill cockroaches in homes and commercial establishments such as hospitals, restaurants and schools. Notice of receipt of these applications does not imply a decision by the Agency on the applications.

Notice of approval or denial of an application to register a pesticide product will be announced in the Federal Register. The procedure for requesting data will be given in the Federal Register if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

A record has been established for this notice under docket number [OPP-30410] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in

writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Written comments filed pursuant to this notice, will be available in the Public Response and Program Resources Branch, Field Operations Division at the address provided from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. It is suggested that persons interested in reviewing the application file, telephone this office at (703-305-5805), to ensure that the file is available on the date of intended visit.

Authority: 7 U.S.C. 136.

List of Subjects

Environmental protection, Pesticides and pests, Product registration.

Dated: May 2, 1996.

Janet L. Andersen,

Acting Director, Biopesticides and Pollution Prevention Division, Office of Pesticide Programs.

BILLING CODE 6560-50-F

FEDERAL EMERGENCY MANAGEMENT AGENCY

Public Meeting; Federal Purchase and Stockpile of Potassium Iodide for Use by the General Public in a Radiological Emergency

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice of Public Meeting.

SUMMARY: FEMA announces the following committee meeting:

NAME: Federal Radiological Preparedness Coordinating Committee (FRPCC), Ad Hoc Subcommittee on Potassium Iodide (KI).

DATES: The meeting will be held June 27, 1996. Any individuals or organizations interested in attending the public meeting or making oral presentations must so indicate by 4:00 PM, May 31, 1996.

TIME OF MEETING: 10:00 AM-4:00 PM.

PLACE: Federal Emergency Management Agency, room 401, 500 C Street, SW., Washington, DC 20472.

PROPOSED AGENDA: The meeting will begin at 10:00 AM with a presentation by the Subcommittee on the background of the Federal potassium iodide policy. That presentation will be followed by a statement of the current issues raised in the Petition for Rulemaking submitted to the U.S. Nuclear Regulatory Commission, and in letters to the Director of FEMA. The meeting will

then turn to attendees who have indicated that they want to make oral presentations, including response to any questions that may be asked by members of the Subcommittee. The meeting will adjourn after the Subcommittee and attendees have completed their presentations and any interaction on the subject matter.

SUPPLEMENTARY INFORMATION: The FRPCC issued its policy on the use of KI as a thyroid blocking agent on July 24, 1985 (50 FR 30258). On December 6, 1994, the FRPCC adopted a September 15, 1994 report and recommendations of the Ad Hoc Subcommittee on Potassium Iodide after review of the issues affecting the purchase and stockpile of KI by the Federal government. The Ad Hoc Subcommittee found no basis for changing the 1985 Federal policy, which states that KI should be purchased and stockpiled for emergency workers and institutionalized persons, and that the decision on its use as a protective action for the general public resides with the State, and in some cases, with local health authorities.

The FRPCC is again reviewing the issue of the Federal purchase, stockpile and use of KI by the general public in the event of a radiological emergency at a commercial nuclear power plant. The Petition for Rulemaking submitted to the U.S. Nuclear Regulatory Commission requests that 10 CFR Part 50.47(a)(10) be revised to read: "A range of protective actions, including sheltering, evacuation, and prophylactic use of iodine, have been developed for the plume exposure EPZ [emergency planning zone] for emergency workers and the general public." In addition, the same Petitioner requested FEMA to reconsider the 1985 Federal Policy. Accordingly, the Federal Radiological Preparedness Coordinating Committee formed an Ad Hoc Subcommittee to review and re-evaluate the issue.

The meeting will be open to the public with approximately 30 seats available on a first-come, first-served basis. Individuals or representatives of organizations who plan to attend the meeting or make oral presentations should contact William F. McNutt, Chairman, Federal Radiological Preparedness Coordinating Committee, Ad Hoc Subcommittee on Potassium Iodide, room 634, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-2857; (facsimile) (202) 646-4183, on or before 4:00 PM, May 31, 1996.
