

products that would compete with the potential imports from Spain. A small portion of these producers are very large, and these specialty products constitute only a small fraction of their overall business. Therefore, we expect the impact of the proposed change on these large companies would be minimal. However, the small producers may be impacted by additional imports. Yet, without specific information on (1) the quantity of additional imports generated by the rule change, (2) the quantity of domestic production, and (3) the degree to which Spanish imports will displace other imports rather than domestic production, the impact on small domestic producers cannot be predicted.

An alternative to this proposed rule is to make no changes in the regulations. We rejected this alternative because Spain has had no reported cases of ASF since September 1994, and, therefore, we have no scientific reason to continue considering Spain to be a country where ASF exists.

This proposed rule contains no information collection or recordkeeping requirements.

Executive Order 12778

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, 9 CFR part 94 would be amended as follows:

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), VELOGENIC VISCEROTROPIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, HOG CHOLERA, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

1. The authority citation for part 94 would continue to read as follows:

Authority: 7 U.S.C. 147a, 150ee, 161, 162, and 450; 19 U.S.C. 1306; 21 U.S.C. 111, 114a, 134a, 134b, 134c, 134f, 136, and 136a; 31 U.S.C. 9701; 42 U.S.C. 4331, and 4332; 7 CFR 2.22, 2.80, and 371.2(d).

§ 94.8 [Amended]

2. In § 94.8, the introductory text would be amended by removing the words “, and Spain” and by adding the word “and” immediately preceding the word “Portugal”.

Done in Washington, DC, this 22nd day of May 1996.

Donald Husnik,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

NUCLEAR REGULATORY COMMISSION

10 CFR Part 150

RIN 3150-AC57

Reasserting NRC's Authority for Approving Onsite Low-Level Waste Disposal in Agreement States; Withdrawal

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule: Withdrawal.

SUMMARY: The Nuclear Regulatory Commission (NRC) is withdrawing a notice of proposed rulemaking that would have reasserted the NRC's jurisdiction in Agreement States over the disposal of licensed material generated and disposed of at nuclear reactor sites. The proposed rule would also have clarified the jurisdiction over disposal of noncritical waste quantities of special nuclear material at reactors and fuel cycle facilities.

FOR FURTHER INFORMATION CONTACT:

Joseph J. Mate, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone (301) 415-6202.

SUPPLEMENTARY INFORMATION:

Background

On August 22, 1988 (53 FR 31880), the Commission published a notice of proposed rulemaking in the Federal Register entitled “Reasserting NRC's Authority for Approving Onsite Low-Level Waste Disposal in Agreement States.” This rule would have reasserted the NRC's jurisdiction in the Agreement States over the disposal of low-level radioactive waste generated and disposed of at reactor sites. The

proposed rule would also have clarified the jurisdiction over the disposal of noncritical waste quantities of special nuclear material at fuel cycle facilities. The NRC would have authorized this disposal under 10 CFR 20.302, but 10 CFR part 20, “Standards for Protection Against Radiation,” was revised in May 1991 (56 FR 23360). The applicable regulation is now 10 CFR 20.2002.

The purpose of the proposed rule was to provide for a more centralized and consistent regulatory review of all onsite waste management activities and to avoid duplication of regulatory effort by the NRC and the Agreement States. The uniform review process that would result from the proposed rule was intended to provide greater assurance that onsite disposal of radioactive material will not present a health hazard and that the disposal of this waste in this manner will not unnecessarily complicate or delay decommissioning.

As a result of publishing the proposed rule in the Federal Register, the NRC received 49 comment letters. Twelve commenters (24 percent) favored the proposal, 37 commenters (76 percent) opposed the proposal. Comments were submitted by private citizens, Agreement and Non-Agreement States, nuclear utilities, nuclear utilities' representatives, and various conservation and public interest groups. The vast majority of the comments favoring the proposal were from nuclear utilities and their representatives. Comments opposed to the proposal came from private citizens, Agreement and Non-Agreement States, and conservation and public interest groups. Nineteen of the commenters questioned the need for the proposed rule, six commenters wanted the States' participation in the approval process to be specified, and a few States questioned the NRC's authority to promulgate the rule. The remaining commenters were concerned with better definitions of the protected and exclusion areas, the type of waste to be covered by the rule, existing onsite disposal, and the impact on regional low-level waste disposal facilities. Some States commented that the Agreement States were more familiar with local conditions and that their requirements were more strict than the NRC's. Of the 10 Agreement States that commented, 9 States were opposed to the amendments. The remaining Agreement State that commented supported the rule but reserved the right to participate in the approval process with full review privileges and expected their concerns to be addressed.

As a result of the public comments received and the relatively low hazards

associated with onsite disposal of low-level waste radioactive material, the NRC reevaluated the merits of the proposed rule. In the 7 years since this rulemaking was originally proposed, there have been a number of approvals granted by Agreement States for onsite disposal of low-level waste material under the equivalent of 10 CFR 20.2002 (successor to 20.302). The NRC staff is not aware of any problems with the Agreement States' approvals of any onsite burials of low-level waste material.

Based on the comments received, the relatively low hazards associated with onsite disposal of this type of radioactive material, and current experience with disposals, the NRC has reevaluated the issues and concluded that it is not necessary to reassert its regulatory jurisdiction over onsite disposal at reactor sites in the Agreement States.

Therefore, the proposed rule is not required and is being withdrawn. Withdrawal of the proposed rule does not affect the current NRC jurisdiction over disposal of special nuclear material by reactor or fuel cycle licensees. With the withdrawal of the proposed rule, the Agreement States will maintain jurisdiction over the disposal of low-level radioactive waste on nuclear reactor sites.

Dated at Rockville, Md, this 22nd day of May, 1996.

For the Nuclear Regulatory Commission,
John C. Hoyle,

Secretary of the Commission.

BILLING CODE 7590-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95-CE-99-AD]

RIN 2120-AA64

Airworthiness Directives; The Don Luscombe Aviation History Foundation Model 8 Series Airplanes.

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to The Don Luscombe Aviation History Foundation (referred to as Luscombe from hereon) Model 8 series airplanes. The proposed action would require installing new

inspection holes, modifying the wing tip fairings, and inspecting the wing spars for intergranular corrosion. Reports of intergranular corrosion occurring in the wings prompted the proposed action. The actions specified by the proposed AD are intended to prevent wing spar failure resulting from intergranular corrosion, which, if not detected and corrected, could result in structural failure of the wings and loss of control of the airplane.

DATES: Comments must be received on or before July 31, 1996.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95-CE-99-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from The Don Luscombe Aviation History Foundation, P.O. Box 63581, Phoenix, Arizona 85082; telephone (602) 917-0969 and facsimile (602) 917-4719. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Ms. Lirio L. Liu, Aerospace Engineer, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Blvd., Lakewood, California, 90712; telephone (310) 627-5229; facsimile (310) 627-5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this

proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95-CE-99-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95-CE-99-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The FAA has received reports of corrosion occurring on both the metal covered wing spars and the fabric-covered wing spars of the Luscombe Model 8 series airplanes. The service history of these airplanes indicates there is a problem of limited access holes to the interior of the metal covered wings to look for any corrosion, which inhibits inspecting the area around the wing spar extrusions. The fabric covered wings on the Luscomb Model 8 airplanes have adequate access holes for inspecting purposes. Routine maintenance inspections have reported intergranular corrosion in the front and rear spar extrusion in the wings of these airplanes.

The Don Luscombe Aviation History Foundation has issued Service Recommendation No. 2, dated December 15, 1993, Revised November 21, 1995, which specifies installing new inspection holes, modifying the wing tip fairings, and inspecting the wing spars for intergranular corrosion.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that AD action should be taken to detect intergranular corrosion in the wing spars, which, if not detected and corrected, could result in structural failure of the wings and loss of control of the airplane.

Since an unsafe condition has been identified that is likely to exist or develop in other Luscombe Model 8 series airplanes of the same type design, the proposed AD would require installing a total of four additional wing inspection holes in the metal covered wings to assist in conducting a more thorough examination of the wing spars, modifying the wing tip fairing so that it is removable, and providing easier access to the interior of the wings. A one
