

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3507 (a)(1)(D)), this notice announces that the Information Collection Request (ICR) for Petroleum Refineries described below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before July 19, 1996.

FOR FURTHER INFORMATION OR A COPY CALL: Sandy Farmer at EPA, (202) 260-2740, and refer to EPA ICR No. 983.05.

SUPPLEMENTARY INFORMATION:

Title: Standards of Performance for Petroleum Refineries (OMB No. 2060-0067; EPA ICR No. 0983.05). This is a request for revision of a currently approved collection.

Abstract: In the Administrator's judgement, volatile organic compound (VOC) emissions from petroleum refineries cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. In order to assure compliance with the emissions standards, adequate monitoring and recordkeeping is necessary. If the information required by the standards were not collected, the Agency would have no means for ensuring that compliance with the NSPS is achieved and maintained by sources subject to the regulation. The information collected is also used for targeting inspections, and is of sufficient quality to be used as evidence in court. The information collected is required under 40 C.F.R. Part 60 Subpart GGG and records of the information are required to be maintained for at least two years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 3/26/96 (FR 61, No. 59 p 13181-82). Upon completion of this comment period, no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.3 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or

for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Normal Data Collection:

Estimated Hours/Response: 0.344
Estimated Number of Responses: 35
Frequency of Response: 365
Estimated Annual Hour Burden: 4393

Performance Test Burden:

Estimated Hours/Response: 37.67
Estimated Number of Responses: 3
Frequency of Response: 1
Estimated Annual Hour Burden: 113

Estimated Total Annual Hour Burden: 4,506 hours.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses: (Please refer to EPA ICR No. 0983.05 and OMB Control No. 2060-0067 in any correspondence.)

SUPPLEMENTARY INFORMATION:**Background**

EPA, USCG, MMS, RSPA, and OSHA published a notice in the Federal Register on June 5, 1996 (61 FR 28642), announcing the availability of the NRT's Integrated Contingency Plan Guidance ("one plan"). The guidance is intended to be used by facilities to prepare emergency response plans. The intent of the NRT is to provide a mechanism for consolidating multiple plans that facilities may have prepared to comply with various regulations into one functional emergency response plan or

integrated contingency plan (ICP). The notice contained the suggested ICP outline as well as guidance on how to develop an ICP and demonstrate compliance with various regulatory requirements.
