SUPPLEMENTARY INFORMATION: a. The
COE has determined that improvements
to the dam are necessary to
accommodate the probable maximum
flood (PMF). Two dam corrections have
been chosen as the most technically
feasible:

- Alternative 1—Raising the dam to
contain the PMF. Features of this
alternative include: a 22-foot cantilever
wall on top of the dam; an additional
gravity monolith on the east bank; a gate
closure across state route 20 on the west
bank; removable closures at each end of
the spillway; high-strength multi-strand
anchors; and mass concrete thrust
blocks topped with overburden.

- Alternative 2—Auxiliary Spillway
to pass the PMF. Features of this
alternative include: gated additional
spillway over the penstocks; four
47'x48' tainter gates; a flip-bucket
energy dissipator and training walls;
and high-strength multi-strand anchors.

b. The COE plans no changes from
current day-to-day operation of the
Bluestone Dam following completion of
construction of necessary modifications.

c. The National Environmental Policy
Act (NEPA) requires the COE to take
into account the environmental impacts
that could result from this Federal
action. NEPA also requires that the COE
discover and address concerns the
public may have about the proposed
project. This occurs during the
"scoping" process. By this Notice, the
COE requests public comments. All
comments received related to the scope
of the project are considered during the
preparation for the EIS.

d. The EIS will discuss impacts that
could occur as a result of construction
and operation of the proposed project
including impacts to biological
resources, cultural resources, and
socioeconomic effects, air quality, noise
impact, and recreation resources.

e. Interested groups and individuals
are encouraged to attend the meetings
and to present oral comments on the
environmental issues which they
believe should be addressed in the Draft
EIS. Anyone who would like to make an
oral presentation should telephone or
write Barry Passmore, the COE contact,
before 4:00 pm, July 31, 1996, so that
time can be allotted during the

meetings, and a name placed on the speakers' list.

f. You can make a difference by sending a letter addressing your specific comments or concerns about this project. Focus on the potential environmental effects of the alternatives, and methods to avoid or lessen impacts. The more specific your comments, the more useful they will be. Comments must be received by August 15, 1996.

g. The COE will evaluate alternatives and make recommendations on how to lessen or avoid impacts. An independent analysis of the issues will be presented in the Draft EIS, available in June 1997. A 45-day comment period will be allotted for review of the Draft EIS.

h. State and Federal agencies are asked to indicate whether they want to be cooperating agencies for the purpose of producing the EIS. Those identified to date include:
