

necessary. This information enables the Agency to: (1) Identify the sources subject to the standard; (2) ensure initial compliance with emission limits; and (3) verify continuous compliance with the standard. Responses are mandatory under 40 CFR Part 60. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on March 26, 1996 [61 FR 13174].

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.6 hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 74.

Estimated Number of Responses: 26,064.

Frequency of Response: semi-annual.

Estimated Total Annual Hour Burden: 16,238 hours.

Estimated Total Annualized Cost Burden: \$0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1055.05 and OMB Control No. 2060-0021 in any correspondence.

Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Disposal Systems Inc., (DSI)

AGENCY: Environmental Protection Agency

ACTION: Notice of final decision on petition reissuance.

SUMMARY: Notice is hereby given that modification of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to DSI, for the Class I injection wells located at Deer Park, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by DSI, of the specific restricted hazardous waste identified in the exemption modification, into the Class I hazardous waste injection wells at the Deer Park, Texas facility specifically identified in the modified exemption, for as long as the basis for granting an approval of this exemption remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued May 8, 1996. The public comment period closed on June 24, 1996. EPA received no comments. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of July 3, 1996.

ADDRESSES: Copies of the reissued petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ-S), 1445 Ross Avenue, Dallas, Texas 75202-2733.

Underground Injection Control Program; Hazardous Waste Land Disposal Restrictions; Petition for Exemption—Class I Hazardous Waste Injection Well, Rollins Environmental Services of Louisiana, Inc., (Rollins)

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on exemption modification.

SUMMARY: Notice is hereby given that a petition for modification to an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Rollins, for the Class I injection well located at the Plaquemine, Louisiana, facility. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by Rollins of the specific restricted hazardous waste identified in the petition modification, into the Class I hazardous waste injection well at the Plaquemine, Louisiana, facility specifically identified in the petition for as long as the basis for granting an approval of this petition remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued on April 25, 1996. The public comment period ended on June 10, 1996. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of July 3, 1996.

ADDRESSES: Copies of the petition for modification and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ-S), 1445 Ross Avenue, Dallas, Texas 75202-2733.

Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Disposal Systems of Corpus Christi, Inc., (DSICC)

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on petition reissuance.

SUMMARY: Notice is hereby given that modification of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to DSICC, for the Class I injection well located at Corpus Christi, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by DSICC, of the specific restricted hazardous waste identified in the exemption modification, into the Class I hazardous waste injection well at the Corpus Christi, Texas facility specifically identified in the modified exemption, for as long as the basis for granting an approval of this exemption remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued May 14, 1996. The public comment period closed on June 28, 1996. EPA received no comments. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of July 3, 1996.

Notice of Final Decision To Grant Chemical Waste Management, Inc., a Modification of An Exemption From the Land Disposal Restrictions of the Solid and Waste Disposal Amendments of 1984 Regarding Injection of Hazardous Wastes

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on a request to modify an exemption from the Hazardous and Solid Waste Amendments of the Resource Conservation and Recovery Act.

SUMMARY: Notice is hereby given by the United States Environmental Protection Agency (USEPA or Agency) that modification of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act (RCRA) has been granted to Chemical Waste Management, Inc. (CWM) of Oakbrook, Illinois. This modification allows CWM to inject RCRA-regulated hazardous wastes which will be banned from land disposal on July 8, 1996, January 8, 1997, and April 8, 1998 as a result of the Phase III Rule. Wastes designated by a total of 91 additional RCRA waste codes, may continue to be land disposed through four waste disposal wells at the facility at Vickery, Ohio. As required by 40 CFR Part 148, CWM has demonstrated, to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the injection zone utilized by CWM's waste disposal facility located near Vickery, Ohio, for as long as the newly exempted waste remains hazardous. This decision constitutes a final Agency action for which there is no administrative appeal.

SUPPLEMENTARY INFORMATION:

Background

CWM submitted a petition for an exemption from the restrictions on land disposal of hazardous wastes on January 19, 1988. Revised documents were received on December 4, 1989, and several supplemental submittals were subsequently made. The exemption was granted on August 7, 1990. On September 12, 1994, CWM submitted a

petition to modify the exemption to include wastes bearing 23 additional wastes codes. Region 5 reviewed documents supporting the request and granted the modification of the exemption on May 16, 1995. A notice of the modification appeared on June 5, 1996 at 60 FR 29592 et seq.

On April 9, 1996, in response to the Land Disposal Restrictions Phase III Rule which set ban dates for a number of hazardous waste constituents, CWM submitted a request to add 91 additional waste codes to its exemption. After careful review of the material submitted, the USEPA has determined, as required by 40 CFR part 148.20(f), that there is a reasonable degree of certainty that waste streams containing constituents designated by these codes will behave hydraulically and chemically like wastes for which CWM was granted its original exemption and will not migrate from the injection zone within 10,000 years. The injection zone is the Mt. Simon Sandstone and the Rome, Conasauga, Kerbel, and Knox Formations. The confining zone is comprised of the Wells Creek and Black River Formations.

A public notice of the proposed decision was issued on May 1, 1996. A single comment letter was received during the public comment period which expired on June 14, 1996. This comment did not provide any information which affected the basis of the decision to modify the CWM exemption.

As a result of this action, CWM may continue to inject the wastes bearing the codes:

K156, K157, K158, K159, K160, K161, P127, P128, P185, P188, P189, P190, P191, P192, P194, P196, P197, P198, P199, P201, P202, P203, P204, P205, U271, U277, U278, U279, U280, U364, U365, U366, U367, U372, U373, U375, U376, U377, U378, U379, U381, U382, U383, U384, U385, U386, U387, U389, U390, U391, U392, U393, U394, U395, U396, U400, U401, U402, U403, U404, U407, U409, U410, and U411

after wastes denoted by these codes are banned from land disposal on July 8, 1996; CWM may continue to inject wastes denoted by the waste code K088 after wastes denoted by this code is banned from land disposal on January 8, 1997; and CWM may continue to inject wastes denoted by the RCRA waste codes:

D018, D019, D020, D021, D022, D023, D024, D025, D026, D027, D028, D029, D030, D031, D032, D033, D034, D035, D036, D037, D038, D039, D040, D041, D042, and D043

after the wastes denoted by these codes are banned from land disposal on April 8, 1998. These waste codes are added to
