Needs and Uses: The Census Bureau is requesting clearance for the collection of data concerning the School Enrollment Supplement to be conducted in conjunction with the October 1996 CPS. The Bureau of the Census and the Bureau of Labor Statistics (BLS) sponsor the basic annual school enrollment questions, which have been collected annually in the CPS for over 25 years. The National Center for Education Statistics (NCES) sponsors the inclusion of the additional questions on summer school enrollment. This survey provides information on public/private elementary and secondary school enrollment, and characteristics of private school students and their families, which is used for tracking historical trends and for policy planning and support. This year we will also ask questions about summer school enrollment and other organized activities in which the child participated during the previous summer. This survey is the only source of national data on the age distribution and family characteristics of college students, and the only source of demographic data on preprimary school enrollment. As part of the Federal Government's efforts to collect data and provide timely information to local governments for policymaking decisions, the survey provides national trends in employment and progress in school. The data are used by Federal agencies; state, county, and city governments; and private organizations responsible for education to formulate and implement education policy. They are also used by employers and analysts to anticipate the composition of the labor force in the future.

Affected Public: Individuals or households.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Jerry Coffey, (202) 395-7314.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau is the preeminent collector and provider of timely, relevant and quality data about the people and economy of the United States. Economic data are the Census Bureau's primary program commitment during nondecennial census years. The Census Bureau, under the authority of Title 13, United States Code, Section 182, conducts this survey which allows us to prepare estimates of the expenditures for residential improvement and repairs. This segment of the construction industry amounted to over \$115 billion in 1994. A portion of these data are collected on form SORAR-705, which is mailed quarterly

to owners of rental or vacant residential properties. Since residential improvement and repairs are a large and growing economic activity, any measure of the construction industry is incomplete without inclusion of these data.

The Census Bureau uses the information to publish improvement and repair expenditures for rental or vacant residential properties. Data on improvements and repairs to owner-occupied properties are collected in the Consumer Expenditure Survey. Combined published estimates are used by a variety of private businesses and trade associations for marketing studies, economic forecasts and assessments of the construction industry. They also provide all levels of government with a tool to evaluate economic policy and measure progress towards established goals. For example, the Bureau of Economic Analysis (BEA) uses the improvement statistics to develop the structures component of gross private domestic investment in the national income and product accounts.

II. Method of Collection

The universe for this survey are the owners or designated representatives of the more than 40 million rental and vacant housing units in the United States. A sample of these owners—i.e., those identified in the Consumer Expenditure Survey—is mailed a questionnaire to report detailed improvement and repair expenditures for their entire property. Approximately 2,000 owners are queried each quarter.

The sample design uses a rotation procedure which brings one-fourth of the sample (approximately 500 properties) into the survey each quarter and takes one-fourth out of the survey each quarter. The data collected are adjusted for unreturned or unusable forms by region and metropolitan statistical area (MSA) status. The weights are adjusted so that sample counts of renter occupied and vacant housing units agree with independently derived controls from the Current Population Survey.

In the Matters of: Serfilco, Ltd. and Jack H. Berg, Respondents; Order Amending June 10, 1996 Order

On June 10, 1996, I issued a Final Decision and Order (hereinafter, the "Final Decision") affirming the findings of the Administrative Law Judge (hereinafter, "ALJ"), that Serfilco, Ltd. and the company's president, Jack H. Oman, Qatar, Saudi Arabia, Syria, the United Arab Emirates, and the Republic of Yemen.

The Final Decision did not fully set forth the scope and breath of the denial of export privileges imposed on the Respondents.
