Technical Summary Reports for Long-Term Storage of Weapons-Usable Fissile Materials and for Surplus Weapons-Usable Plutonium Disposition

AGENCY: Department of Energy. **ACTION:** Notice of availability.

SUMMARY: The Department of Energy announces the availability of the Technical Summary Report for the Long-Term Storage of Weapons-Usable Fissile Materials and the Technical Summary Report for Surplus Weapons-Usable Plutonium Disposition. The first report summarizes DOE's assessment of the technical, cost, and schedule data for the reasonable alternatives for the long-term storage of weapons-usable fissile materials. The second report summarizes DOE's assessment of the technical, cost, and schedule data for disposition of the nation's plutonium surplus to national security requirements.

ADDRESSES: Requests for copies of the reports or comments on the reports should be directed to: the Office of Fissile Materials Disposition, U.S. Department of Energy, Post Office Box 23786, Washington DC 20026–3786. Copies of the reports can also be obtained by calling (answering machine) or faxing 1–800–820–5156. Comments are requested by August 31, 1996.

FOR FURTHER INFORMATION CONTACT: Additional information about the storage and disposition of surplus fissile materials can be obtained by writing to U.S. Department of Energy, ATTN: MD– 3, 1000 Independence Ave., SW, Washington, DC 20585, or telephoning (202) 586–2700. Information is also available on-line at the Office of Fissile Materials Disposition Internet site: "http://web.fie.com/htdoc/fed/doe/fsl/ pub/menu/any"

SUPPLEMENTARY INFORMATION:

Background

The reasonable alternatives for the storage of weapons-usable fissile material and the disposition of plutonium were determined by the DOE and published in the "Summary Report of the Screening Process (DOE/MD-0002)," dated March 29, 1995. The reasonable alternatives for long-term storage included upgrading existing storage facilities or constructing new storage facilities. The reasonable alternatives for PU Disposition included reactor, immobilization and deep borehole emplacement technologies. The environmental impacts of the reasonable alternatives for both longterm storage and plutonium disposition were analyzed and published in the "Storage and Disposition of Weapons-Usable Fissile Materials Draft Programmatic Environmental Impact Statement," dated February 1996.

Scope of Reports

The scope of the long-term storage report is limited to presenting the technical, cost and schedule data and assessment to support future decisions for storage of weapons-usable fissile materials, including highly enriched uranium and plutonium. The scope of the plutonium disposition report is limited to presenting the technical, cost, and schedule data for plutonium disposition and assessment to support future decision making.

I. Background

In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (Pub. L. No. 93–275) and the Department of Energy Organization Act (Pub. L. No. 95-91), the Energy Information Administration is obliged to carry out a central, comprehensive, and unified energy data and information program. As part of this program, EIA collects, evaluates. assembles, analyzes, and disseminates data and information related to energy resource reserves, production, demand, and technology, and related economic and statistical information relevant to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs.

The EIA, through its Form EIA–28, collects financial information and other measures of energy-related business efforts and results from major energy companies. Since the FRS data are collected on a uniform, segmented basis, the comparability of information across energy lines of business is unique to this reporting system. For example, petroleum activities can be compared to
