

available habitat for food, shelter, and reproduction.

The EA consider the environmental consequences of several alternatives for each project. One action proposed for each project is the issuance of the ITP based upon submittal of the HCP as proposed. This alternative provides for restrictions that include placing no habitable structures seaward of the designated ABM critical habitat, establishment of walkover structures across designated critical habitat, a prohibition against housing or keeping pet cats, ABM competitor control and monitoring measures, scavenger-proof garbage containers, creation of educational and information brochures on ABM conservation, and the minimization and control of outdoor lighting. The HCP provides funding sources for these mitigation measures. Another alternative is consideration of different project designs that further minimize permanent loss of ABM habitat. A third alternative is no-action, or the request for authorization to incidentally take the ABM.

As stated above, the Service has made a preliminary determination that the issuance of this ITP is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of NEPA and will result in a FONSI. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the EA and HCP. An appropriate excerpt from the FONSI reflecting the Service's finding on the application is provided below:

Based on the analysis conducted by the Service, it has been determined that:

1. Issuance of an ITP would not have significant effects on the human environment in the project area.
2. The proposed take is incidental to an otherwise lawful activity.
3. The Applicants have ensured that adequate funding will be provided to implement the measures proposed in the submitted HCP.
4. Other than impacts to endangered and threatened species as outlined in the documentation of this decision, the indirect impacts which may result from issuance of the ITPs are addressed by other regulations and statutes under the jurisdiction of other government entities. The validity of the Service's ITPs are contingent upon the Applicants' compliance with the terms of their permits and all other laws and regulations under the control of State, local, and other Federal governmental entities.

The Service will also evaluate whether the issuance of either Section

10(a)(1)(B) ITP complies with Section 7 of the Act by conducting an intra-Service Section 7 consultation. The results of the biological opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue either ITP.

Acting Regional Director.

Title: On-Demand System for Printing USGS Maps.

OMB approval number: New Collection.

Abstract: Customers for USGS maps will be invited to indicate their satisfaction with an experimental, on-demand version of a USGS topographic map as compared to the standard printed edition of the same map. Potential respondents will be mailed an evaluation package consisting of sample maps and a short questionnaire. Those electing to respond will then use the postage-paid questionnaire to answer specific questions about the experimental map and to submit additional comments they may wish to offer. Information from respondents will be used to evaluate a point-of-sale map printing system the USGS intends to develop under a cooperative research and development agreement with private industry. The proposed collection is limited in scope to the on-demand printing system and its output products, and to the suitability of these experimental products to meet respondent applications for USGS maps.

Bureau form number: None.

Frequency: An estimated 2-3 surveys per year as indicated by technical milestones reached during the course of the on-demand development project and by customer reaction to initial map products generated from the on-demand system.

Description of respondents: General public USGS map purchasers; dealers of USGS maps.

Estimated completion time: 0.1 hours per response.

Annual responses: 1,000.

Annual burden hours: 100 hours.

FOR FURTHER INFORMATION CONTACT:

Information related to this action, including the environmental assessment, is available for review at the Bureau of Land Management, Farmington District Office, 1235 LaPlata Highway, Farmington, NM 87401.

SUPPLEMENTARY INFORMATION:

Publication of this notice segregates the public land described above from all other forms of appropriation under the public land laws, including the general mining laws, except for leasing and conveyance under the Recreation and Public Purposes Act and leasing under the mineral leasing laws for a period of two (2) years from date of this publication in the Federal Register. The segregative affect will terminate upon issuance of the lease and patent to the Blanco Canyon Word of Faith, Inc., or two (2) years from the date of this publication, whichever occurs first.

The lease, when issued, will be subject to the following terms:

1. Provisions of the Recreation and Public Purposes Act and to all applicable regulations of the Secretary of the Interior.

2. Provisions of the Resource Conservation and Recovery Act of 1976 (RCRA) as amended, 42 U.S.C. 6901-6987 and the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) as amended, 42 U.S.C. 9601 and all applicable regulations.

4. Provisions that the lease be operated in compliance with the approved Development Plan.

The patent, when issued, will be subject to the following terms:

1. Reservation to the United States of a right-of-way for ditches and canals in accordance with 43 U.S.C. 945.

2. Reservation to the United States of coal.

3. All valid existing rights, e.g. rights-of-way and leases of record.

4. Provisions that if the patentee or its successor attempts to transfer title to or control over the land to another or the land is devoted to a use other than that for which the land was conveyed, without the consent of the Secretary of the Interior or his delegate, or prohibits or restricts, directly or indirectly, or permits it agents, employees, contractors, or subcontractors, including without limitation, lessees, sublessees and permittees, to prohibit or restrict, directly or indirectly, the use of any part of the patented lands or any of the facilities whereon by any person

because of such person's race, creed, color, or national origin, title shall revert to the United States.

The lands are not needed for Federal purposes. Leasing and later patenting is consistent with current Bureau of Land Management policies and land use planning. The estimated time of lease issuance is December 31, 1996, with the patent being issued upon substantial development taking place. The proposal serves the public interest since it would provide a church and recreation facilities that would meet the needs of the surrounding Navajo Indian population.

Acting Assistant District Manager for Lands and Renewable Resources.
