L. 104-13, 44 U.S.C. Chapter 35). OMB approval has been requested by September 30, 1996.

In accordance with 5 CFR 1320.8(d)(1) the Occupational Safety and Health Administration (OSHA) published a 60-day preclearance Federal Register notice (61 FR 10384) on March 13, 1996, inviting public comment. Due to extensive coordination efforts with the National Advisory Committee on Occupational Safety and Health (NACOSH), OSHA is now completing the analysis of all public comments received. A copy of this emergency review ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor Acting Departmental Clearance Officer, Theresa M. O'Malley ({202} 219-5095).

Comments and questions concerning this emergency review Hazard Communication ICR should be forwarded to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for OSHA, Office of Management and Budget, Room 10235, Washington, DC 20503 ({202} 395-7316).

The Office of Management and Budget is particularly interested in comments which:

*Affected Public:* Business or other for-profit, Federal government and State, Local or Tribal governments.

*Number of Respondents:* 5,041,918.

*Total Burden Hours:* 13,201,863.

*Total Burden Cost (capital/startup):* 0.

*Total Burden Cost (operating/maintaining):* 0.

*Description:* The Hazard Communication Standard and its information collection requirements are designed to ensure that the hazards of all chemicals produced or imported are evaluated and that information concerning their hazards is transmitted to employees and downstream employers. The standard requires chemical manufacturers and importers to evaluate chemicals they produce or import to determine if they are hazardous; for those chemicals determined to be hazardous, material safety data sheets and warning labels must be developed. Employers are required to establish hazard communication programs, to transmit information on the hazards of chemicals to their employees by means of labels on containers, material safety data sheets and training programs. Implementation of these collection of information requirements will ensure all employees have the "right-to-know" the hazards and identities of the chemicals they work with and will reduce the incidence of chemically-related occupational illnesses and injuries.
