

policy successfully allowed commercial developers access to an operational space-based system to help develop, but not implement, their nascent services.

In light of the fact that a commercial industry is starting to emerge in precisely this area of data collection and location services, (e.g., Mobile Space Services) as well as the U.S. Government's long-standing policy against competing with the private sector, NESDIS will no longer promote the use of the Argos system for commercial non-environmental applications.

Public Meeting

As new, private space-based data collection and location systems begin to evolve, NOAA is eager to explore new opportunities that will be consistent with NOAA's mission and user requirements and national policies supporting commercial development. To do this requires an active dialogue between both users and service providers. In order to launch such a dialogue, NOAA, in cooperation with the Department of Commerce Office of Air and Space Commercialization, will sponsor a public meeting on data collection and location system use policy.

This public meeting will bring together current and planned space-based data collection and location service providers and users to present, discuss, and document pertinent information necessary to reevaluate and redefine overall government policy and practice. One possible outcome of this meeting may be the development of consolidated regulations concerning use of GOES DCS and Argos data collection systems.

The meeting will be held at the NOAA Complex in Silver Spring, Maryland on December 12 and 13, 1996. The first day of the meeting will focus on technical, informational presentations and exhibits by industry participants. The second day of the meeting will focus on the policy discussions.

Parties interested in participating in the public meeting, particularly those that would like to give oral and/or written presentations or who would like to display materials in the exhibit room should contact Mr. Dane Clark (See **FOR FURTHER INFORMATION CONTACT**) by close of business, November 1, 1996. Due to time constraints, oral presentations may be limited. The exhibit area will be accessible on December 11, 1996, from 9:30 a.m. to 5:00 p.m. for those participants who will be setting up exhibits.

Dated October 1, 1996.

Assistant Administrator for Satellite and Information Services.
