remediate the building slabs, basements, sub-surface utilities and soil at the Parks Township facility. Radioactive contamination at the licensee's Parks Township facility discussed in the SDP consists of soils and building rubble contaminated with uranium, transuranic radionuclides, and byproduct material resulting from licensed operations that occurred from the late 1950s until the early 1990s.

The NRC will require the licensee to remediate the Parks Township facility to meet NRC's decommissioning criteria, and during the decommissioning activities, to maintain effluent and doses within NRC requirements and as low as reasonably achievable.

Prior to approving the decommissioning plan, NRC will have made findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report and an Environmental Assessment. Approval of the SDP will be documented in an amendment to SNM-414.

The NRC hereby provides notice that this is a proceeding on an application for amendment of a license falling within the scope of Subpart L "Informal Hearing Procedures for Adjudication in Materials Licensing Proceedings," of NRC's rules and practice for domestic licensing proceedings in 10 CFR Part 2. Pursuant to § 2.1205(a), any person whose interest may be affected by this proceeding may file a request for a hearing in accordance with § 2.1205(c).
