

engage in a specified activity (other than commercial fishing) within a specified geographical region, if certain findings are made and regulations are issued. Under the MMPA, the term "taking" means to harass, hunt, capture, or kill or to attempt to harass, hunt, capture or kill marine mammals.

Permission may be granted for periods up to 5 years if NMFS finds, after notification and opportunity for public comment, that the taking will have a negligible impact on the species or stock(s) of marine mammals and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses. In addition, NMFS must prescribe regulations that include permissible methods of taking and other means effecting the least practicable adverse impact on the species and its habitat, and on the availability of the species for subsistence uses, paying particular attention to rookeries, mating grounds and areas of similar significance. The regulations must include requirements pertaining to the monitoring and reporting of such taking. Regulations governing the taking of bottlenose and spotted dolphins incidental to oil and gas structure removal activities in the Gulf of Mexico were published on October 12, 1995 (60 FR 53139) and remain in effect until November 13, 2000.

#### Summary of Request

NMFS received requests for letters of authorization on September 30, 1996, from Unocal Corporation and on October 4, 1996, from Burlington Resources. These letters requested a take by harassment of a small number of bottlenose and spotted dolphins incidental to the described activity. Issuance of these letters of authorization are based on a finding that the total takings will have a negligible impact on the bottlenose and spotted dolphin stocks of the Gulf of Mexico.

- Establish the following bycatch reduction criteria for a BRD to be certified: It must reduce the bycatch of juvenile red snapper (age 0 and age 1) by 50 percent from the average level of mortality on those age groups during the years 1984-89.

- Establish a framework procedure for modifying the bycatch reduction criteria.

• Establish a framework procedure for establishing BRD certification and decertification criteria and a BRD testing protocol.
