I. Information Collection Requests (ICRs)

EPA is seeking comments on the following ICRs:

1. Title: FIFRA Section 29 Annual Report on Conditional Registrations. ICR No. 0601.06. OMB No. 2070-0026. Expiration date: July 31, 1996.

Affected entities: Producers of pesticide products who seek conditional registrations.

Abstract: Under section 29 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the EPA Administrator must submit an annual report to Congress. Included in this report is the total number of applications for conditional registration of pesticides under FIFRA section 3(c)(7)(B) and 3(c)(7)(C) that were filed during the immediately preceding fiscal year. The information collected under this information collection request is the pesticide production volume for the previous fiscal year.

The information collected under section 29 of FIFRA is required by Congress to monitor the conditional registration program. The submission of annual production data is a requirement of a conditional registration as described in 40 152.115(b).

There are no third party disclosures associated with this activity.

Burden Statement: This information is collected annually for each conditional registration of a new active ingredient or new use. The overall respondent burden hours associated with this collection have decreased from the current ICR estimate of 84 total hours per year to 36 total hours per year. This change is due to the decrease in the number of conditional registrations submitted. The annual cost of this ICR has only slightly decreased from \$2,628 per year to \$2,534.40 (\$211.20 per respondent) per year due to more realistic labor rates supplied by the Bureau of Labor Statistics which reflect more accurately the costs borne by the pesticide manufacturers.

The annual respondent burden for this program is estimated to average 1.5 hours per response, including time for: reading correspondences, planning activities, gathering information, compiling and reviewing data, completing paperwork, and storing/maintaining data. On average, each respondent would submit two responses per year so the average burden per respondent would be 3 hours per year for this ICR.

2. Title: Data Generation for Pesticide Reregistration. ICR No. 1504. OMB No. 2070-0107. Expiration date: June 30, 1996.

Affected entities: Producers of pesticide products who seek to support reregistration of their product.

Abstract: FIFRA as amended in 1988 mandates that EPA reregister pesticides originally registered before November 1984. It establishes a process and a schedule for the development of the information EPA needs to assess
