### NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-369 and 50-370]

### Duke Power Company, McGuire Nuclear Station, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-9 and NPF-17, issued to Duke Power Company (the licensee), for operation of the McGuire Nuclear Station, located in Mecklenburg County, North Carolina.

### Environmental Assessment

#### Identification of the Proposed Action

The proposed action would revise the current combined Technical Specifications for Unit 1 and Unit 2 by separating them into individual volumes for each unit.

The proposed action is in accordance with the licensee's application for amendments dated July 18, 1994, as supplemented by letter dated October 9, 1995.

#### The Need for the Proposed Action

The proposed action would facilitate Technical Specification changes when it was required to be done separately for each unit. This would especially be important when, for a period of time, Unit 1 will have different steam generators than Unit 2.

#### Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed action and concludes that the changes proposed by the licensee are administrative in nature and have no nonradiological or radiological environmental significance.

The change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be
