

EEO-3 data are used by the Commission to investigate charges of employment discrimination against local referral unions. Pursuant to Section 709(d) of Title VII, EEO-3 data are shared with 89 state and local fair employment practices agencies, and with other federal agencies.

Burden Statement: The respondent burden for this collection is minimal. The estimated number of respondents included in the EEO-3 survey is 3,000 local unions. The estimated number or responses per respondent is one EEO-3 report, taking an estimated one and one half hours to complete. The total number of burden hours therefore is estimated to be 4,500.

This is an average burden estimate and is based on a long history (since 1985) of identical reporting experience. The burden is dependent on the size of the local union and on the number of referrals made by the union during the reporting period. Smaller unions may well take under an hour to complete the report. Over the years, the Commission has reduced the reporting and record keeping burden by eliminating all local unions with fewer than 100 members, by requiring record keeping for a two month period only, by changing the data collection instrument, and by changing the frequency of the data collection from an annual to a biennial basis. Further reductions, such as filing by diskette or magnetic tape, have been less successful as local unions appear less likely to have computerized record keeping and reporting capabilities.

Dated: November 26, 1996.

For the Commission.

Findings of Scientific Misconduct

AGENCY: Office of the Secretary, HHS.
ACTION: Notice.

SUMMARY: Notice is hereby given that the Office of Research Integrity (ORI) has made a final finding of scientific misconduct in the following case:

Yi Li, University of Illinois, Urbana-Champaign: Based upon an investigation conducted by the University of Illinois, Urbana-Champaign, information obtained by the Office of Research Integrity (ORI) during its oversight review, and Mr. Li's own admission, ORI found that Yi Li, while a candidate for a Ph.D. degree in the Neuroscience Program at the University of Illinois, Urbana-Champaign, engaged in scientific misconduct by fabricating an experimental study and results for research represented in an abstract prepared for submission for presentation at a national meeting. The research was supported by a grant from the National Institute on Aging (NIA), National Institutes of Health (NIH).

The fabricated abstract and results addressed an electrophysiological study of the behavioral correlates for long-term potentiation in the motor cortex of the central nervous system of freely moving rats.

Mr. Li has accepted the ORI finding and has entered into a Voluntary Exclusion Agreement with ORI in which he has voluntarily agreed, for the three (3) year period beginning November 18, 1996:

(1) To exclude himself from serving in any advisory capacity to the Public Health Service (PHS), including but not limited to service on any PHS advisory committee, board, and/or peer review committee, or as a consultant; and

(2) That any institution that submits an application for PHS support for a research project on which the respondent's participation is proposed or which uses the respondent in any capacity on PHS supported research must concurrently submit a plan for supervision of his duties. The supervisory plan must be designed to ensure the scientific integrity of the respondent's research contribution. The institution must submit a copy of the supervisory plan to ORI.
