

this amount by the total quantity of subject merchandise sold to each of the respective importers. This specific rate calculated for each importer will be used for the assessment of antidumping duties on the relevant entries of subject merchandise during the POR.

Furthermore, the following deposit rates will be effective upon publication of the final results of this administrative review for all shipments of shop towels from Bangladesh entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) The cash deposit rates for reviewed companies will be the rates established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) for all other producers and/or exporters of this merchandise, the cash deposit rate shall be the rate established in the investigation of sales at less than fair value, which is 4.60 percent.

These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: December 2, 1996.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement ("Agreement") establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* ("Rules"). These Rules were published in the Federal Register on February 23, 1994 (59 FR 8686). The panel review in this matter will be conducted in accordance with these Rules.

(b) a Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first

Request for Panel Review (the deadline for filing a Notice of Appearance is January 6, 1997); and

(c) the panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and substantive defenses raised in the panel review.

Dated: November 27, 1996.

SUPPLEMENTARY INFORMATION

I. Abstract

Fishermen wanting to fish in regulated fisheries in the Exclusive Economic Zone off Alaska must apply for a Federal Fisheries Permit, a Federal Processor Permit, a High Seas Power Troller Permit, or an Experimental Fishing Permit. The issuance of a permit is an essential ingredient in the management of fishery resources. Identification of the participants, harvest gear types, descriptions of vessels or shoreside facilities, and

expected activity levels is needed to measure the consequences of management controls, and is an effective tool in the enforcement of other fishery regulations. Experience has shown that fines for violations of specific fishery regulations are not as effective as the threat of a permit revocation that would exclude the vessel from the fishery altogether. Experimental fishing provides information not otherwise available through research or commercial fishing operations.

II. Method of Collection

Each of the four permits is mandatory for certain fishery participants. A permit is obtained through completion of an application.

III. Data

Form Number: None.

Type of Review: Regular Submission.

Affected Public: Individuals, Businesses and other for-profit (commercial fishermen, fish processors).
