SUPPLEMENTARY INFORMATION: The ISDP facilities are designed to improve water levels and circulation in the south Delta channels to benefit local agriculture and fish habitat and to allow the State Water Project (SWP) to increase winter water diversions into Clifton Court Forebay (Forebay). The Forebay is adjacent to the SWP's Harvey O. Banks Delta Pumping Plant, where water is pumped into the California Aqueduct. The proposed project would enable the Banks plant to take advantage of high winter flows and expand pumping from 6,700 to 10,300 cubic feet per second. These surplus flows could then be stored in reservoirs south of the Delta for delivery later in the year.

The basic components of the program are:

- Three permanent flow control structures in the south Delta, one on Middle River 1/2 mile upstream of the confluence of Middle River, Trapper Slough, and North Canal; one on Old River 1/2 mile upstream of the Delta-Mendota Canal intake; and one on Grant Line Canal 1/2 mile east of Old River.
- A fish control structure on Old River 1/2 mile downstream of the confluence with San Joaquin River;
- A new intake structure at the north end of Clifton Court Forebay; and
- Dredging of approximately 5 miles of Old River, north of the forebay.

Dated: December 9, 1996.

Roger K. Patterson,

Regional Director.

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Judgment Under the Clean Water Act

In accordance both with a court order dated November 19, 1996, and

Department Policy, 28 C.F.R. § 50.7, notice is hereby given that a proposed Consent Decree in *United States v. The Telluride Company*, Civil No. 93-K-2181 (D. Colo.), was lodged with the United States District Court for the District of Colorado on October 15, 1996.

The November 19, 1996, Court order required, among other things, that the proposed Consent Decree be published in the Federal Register in each of three consecutive weeks. This is the second of the three publications.

The proposed Consent Decree concerns alleged violations of section 301(a) of the Clean Water Act, 33 U.S.C. § 1311(a), resulting from the defendants' unauthorized filling of over 46 acres of alpine wetlands as part of their mountain resort development near Telluride, San Miguel County, Colorado. As part of the proposed Consent Decree, defendants will be required to pay a penalty of \$1.1 million dollars and to implement a 16-acre restoration project to the satisfaction of the U.S. Environmental Protection Agency. Defendants have also agreed to abide by a site-wide management plan for the continued protection and preservation of the remaining wetlands that they own. The proposed Consent Decree preserves the United States' right to appeal an earlier ruling of the Court. If the appeal is successful, defendants will be obligated to perform an additional 15-acres of wetland restoration along the San Miguel River and pay an additional penalty of \$50,000.

The Clerk of the United States District Court will receive written comments relating to the proposed Consent Decree until January 22, 1997. Comments should be addressed to James R. Manspeaker, Clerk of the District Court, United States Courthouse, 1929 Stout Street, Denver, CO 80294. Please send a copy of any comments to Robert H. Foster, U.S. Department of Justice, Environmental Defense Section, 999 18th Street, Suite 945, Denver, CO 80202. The comments should refer to *United States v. The Telluride Company* Civil No. 93-K-2181 (D. Colo.), and should also make reference to DJ # 90-5-1-4-293.

The proposed Consent Judgment may be examined at three (3) locations: (1) the Clerk's Office, United States District Court for the District of Colorado, 1929 Stout Street, Denver, CO 80295, (2) the Clerk's Office, San Miguel County Courthouse, 305 West Colorado, Telluride, CO 81435 and (3) the Clerk's Office, United States District Court for the District of Colorado, 402 Rood
