#### [Docket No. 50-271]

#### **Vermont Yankee Nuclear Power Corporation and Vermont Yankee Nuclear Power Station; Environmental Assessment and Finding of No Significant Impact**

The U.S. Nuclear Regulatory Commission (the Commission) is considering approval of a procedure for on site disposal of silt containing low levels of radioactivity at the Vermont Yankee Nuclear Power Station (VYNPS), pursuant to 10 CFR 20.2002, as requested by the Vermont Yankee Nuclear Power Corporation, (the licensee). VYNPS is located in Windham County, Vermont.

#### **Environmental Assessment**

##### *Identification of the Proposed Action*

The proposed action would authorize the on site relocation of silt containing low levels of radioactivity which was or will be removed from the cooling tower basins at VYNPS.

The proposed action is in accordance with the licensee's application dated August 30, 1995.

##### *The Need for the Proposed Action*

The proposed action will eliminate the need to hold the material for future disposal in a 10 CFR Part 61 licensed facility and will save space at licensed facilities for waste materials containing higher levels of activity. It will also save substantial cost.

##### *Environmental Impacts of the Proposed Action*

The Commission has completed its evaluation of the proposed action and concludes that the proposed action will minimize the risk of unexpected exposure. The licensee's proposal was evaluated against the staff's guidelines for on site disposal and found to be acceptable. The potential exposure to members of the general public from the radionuclides in the silt was determined to be less than 1 mrem/year. The potential exposure to an inadvertent intruder following licensee release of the disposal site was determined to be less than 5 mrem/year. The proposed action will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does involve features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

##### *Alternatives to the Proposed Action*

Since the Commission has concluded there is no significant environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

##### *Alternative Use of Resources*

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Vermont Yankee Nuclear Power Station, dated July 1972.

##### *Agencies and Persons Consulted*

In accordance with its stated policy, on December 21, 1995, the staff consulted with the Vermont State official, Mr. William Sherman of the Vermont Department of Public Service, regarding the environmental impact of

the proposed action. The State official questioned the impact of the proposed action on decommissioning of VYNPS. At the time of decommissioning, the licensee will be required to demonstrate that the activity levels on the site are sufficiently low to permit releasing the site for general use.

##### *Finding of No Significant Impact*

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated August 30, 1995, which is available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Brooks Memorial Library, 224 Main Street, Brattleboro, VT.

**Notice of Request to OMB for Approval for Continuation of Form OPM-1386B**

**AGENCY:** Office of Personnel Management (OPM).

**ACTION:** Proposed information collection submitted for public comment and recommendations.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3506-3507), the Office of Personnel Management (OPM) is submitting to the Office of Management and Budget a request to extend its approval of form OPM-1386B, Applicant Race and National Origin Questionnaire, which gathers information concerning the race and national origin of applicants for employment under the Outstanding Scholar provision of the Luevano Consent Decree, 93 F.R.D. 68 (1981).

This proposed extension was also reported on October 27, 1995 at 60 FR 55070. At that time, the public was invited to comment on the need for this information, its practical utility, the accuracy of OPM's burden estimate, and on ways to minimize that reporting burden. During the sixty-day comment period OPM received only one substantive comment, which was that OPM should specify that the current version of form 2386, for which an approval extension is sought, is Form OPM-1386B. That fact is made explicit in the current announcement and all persons who requested copies of the form were sent Form OPM-1386B.

For copies of the proposal, contact James M. Farron at (202) 418-3208 or by e-mail to [jmfarron@mail.opm.gov](mailto:jmfarron@mail.opm.gov).

**DATES:** Comments on this proposal should be received on or before March 22, 1996.

**ADDRESSES:** Send or deliver any comments to BOTH of the following addresses: Patricia Paige, Director, Staffing Reinvention Office,

Employment Service, U.S. Office of Personnel Management, 1900 E Street, NW, Washington, DC 20415; and Joseph Lackey, OPM Desk Officer of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW, Room 10235, Washington, DC 20503.

For further information, contact Mike Carmichael or Christina Gonzales, (202) 606-0830, FAX (202) 606-2329.

**SUPPLEMENTARY INFORMATION:**

Purpose of Form OPM-1386B

A Federal court decree, issued in 1981 and still binding, requires recordkeeping on Federal employment selection procedures, including race and national origin (RNO) data, to determine the "relative impact of the procedure upon blacks and upon Hispanics as compared with non-Hispanic whites." OPM and other agencies use form OPM-1386B to collect the RNO data from applicants being considered for selection under the Outstanding Scholar provision of the decree. Using the standardized form makes it easier to collect and consolidate the required data for use by the Federal Government and by the plaintiffs. OPM and agencies do not need to use form OPM-1386B to collect data on applicants being considered through traditional examining processes; court-required data on those applicants is collected as part of an application process that is not required for Outstanding Scholars.

The form OPM-1386B is not considered in the selection process, but is used to collect statistical data.

**Annual Reporting Burden**

Approximately 100,000 forms will be processed annually. The average estimated response time is 5 minutes for a total public burden of 8,333 hours.
