

Director, Southwest Region, NMFS, NOAA, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802-4213 (310-980-4016).

Written comments or requests for a public hearing should be submitted to the Chief, Endangered Species Division, Office of Protected Resources.

**SUPPLEMENTARY INFORMATION:** Ms. Petrusso and CCWD request permits under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217-227).

Ms. Petrusso, a graduate assistant of Michigan State University (P605), requests a 2-year permit to determine the physical condition of juvenile chinook salmon rearing in mainstem habitats between Keswick Dam and Red Bluff on the Sacramento River. Listed juvenile salmon will be captured and handled indirectly during run-of-the-river sampling activities. Any adipose fin-clipped juveniles collected, including juvenile, listed, hatchery-produced, winter-run chinook salmon, will be sacrificed and provided to the U.S. Fish and Wildlife Service at Red Bluff, CA for coded-wire tag extraction. The proposed project will contribute to BOR's efforts to reduce migration impediments to the four runs of Sacramento River chinook salmon by providing baseline data for interpretation of the results of entrainment studies. In addition, the study will advance the understanding of the early life history and ecology of young chinook salmon in the upper Sacramento River.

CCWD (P606) requests a 5-year permit to monitor its Mallard Slough pumping facility for the presence of listed juvenile salmon in compliance with the California ESA requirements imposed by the California Department of Fish and Game. Listed juvenile salmon may be captured and handled during bimonthly sampling from February 15 to July 31 each year within the Mallard Slough intake channel and in the adjacent San Joaquin River channel. Any adipose fin-clipped juveniles collected, including juvenile, listed, hatchery-produced, winter-run chinook salmon, will be sacrificed and provided to the U.S. Fish and Wildlife Service at Stockton, CA for coded-wire tag extraction. Sampling will not occur if Delta water quality conditions do not allow the operation of the Mallard Slough facility. The monitoring results will indicate the relative abundance of sensitive fish species and allow CCWD to modify operation of the Mallard

Slough facility as necessary to minimize potential entrainment losses.

Those individuals requesting a hearing (see **ADDRESSES**) should set out the specific reasons why a hearing on either application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in these application summaries are those of the applicants and do not necessarily reflect the views of NMFS.
