DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of a Draft Recovery Plan for the Rare Species of Soldier Meadows for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for the threatened desert dace, *Eremichthys acros*, and the category 1 candidate Soldier Meadows cinquefoil, *Potentilla basaltica*. These species are endemic to Soldier Meadows, Humboldt County, Nevada. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before April 29, 1996, to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the State Supervisor,

Nevada State Office, U.S. Fish and Wildlife Service, 4600 Kietzke Lane, Building C-125, Reno, Nevada, 89502-5093 (Phone: 702-784-5227). Written comments and materials regarding the plan should be sent to Mr. Carlos H. Mendoza, State Supervisor, at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Selena Werdon at the above address, or telephone 702-784-5227.

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the U.S. Fish and Wildlife Service's (Service) endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for reclassification or delisting, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (Act) (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

Desert dace are endemic to Soldier Meadows, located in western Humboldt County, Nevada. The species occupies 10 thermal spring systems and approximately 5 kilometers (3.1 miles) of spring outflow stream habitat. No recent population estimate is available, but the species is considered to be relatively abundant in some spring systems. Threats to the species when listed included habitat modifications due to agricultural diversions, potential geothermal and/or mineral development; and introductions of nonnative fishes; and parasites.
