Investigation findings show that the workers produce electrical power.

The Department's denial for TAA for workers of the subject firm was based on the fact that the "contributed importantly" test of the Group Eligibility Requirements of the Trade Act was not met. There were no declines in sales or production at Montana Power during the time period relevant to the investigation. Additionally, U.S. imports of electricity declined absolutely and relative to domestic supply during the same time period.

The Department's denial for NAFTA-TAA for workers of the subject firm was based on the fact that there was no decline in sales or production during the relevant period. There was no shift in production from the workers' firm to Mexico or Canada. U.S. imports of electricity declined absolutely and relative to domestic supply during the same time period.
