

Needs and Uses: Section 90.517 provides developmental authorizations that are usually employed by licensees who wish to test and develop new use of radiocommunications facilities. Each such developmental licensee must report upon termination of development, or application for license renewal, specific information evaluating the usefulness of previous or desired continued operation of such a system. Commission personnel use the data to evaluate the need for renewal of the applicant's authorization and to decide the desirability of instituting rulemaking proceedings involving new technologies or new use of the radio spectrum.

Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.
