

the vessels that reside in the Complex, there is a transient population estimated at 110 vessels which have marine sanitation devices.

The resources of the Stage Harbor Complex are recreational and commercial. One of the Towns most used public bathing beach is located on Stage Harbor Road at the head of Oyster Pond. The northern tip of the Monomoy National Wildlife Refuge abuts the proposed No Discharge Area and provides recreational opportunities in addition to its wildlife role. The Stage Harbor Complex is also used by both recreational and commercial shell fishermen for the harvest of quahogs, softshell clams, mussels, oysters, and bay scallops and is the site of the Towns' only commercial aquaculture operations.

Therefore, based on an examination of the petition and its supporting information, which included a site visit by EPA New England staff, I have determined that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the areas covered under this determination which include Stage Harbor, north of a line drawn across its mouth at Nantucket Sound, and the following tributaries: Little Mill Pond, Mill Pond, Mitchell River, Oyster Pond River, and Oyster Pond. The Proposed area encompasses approximately 620 acres of water-sheet in the southeast corner of the town of Chatham. The latitude and longitude defining the boundaries of the Stage Harbor Complex are—Oyster Pond 41°40'84"-069°57'84", Little Mill Pond 41°40'6"-069°57'3", and at the mouth of Stage Harbor 41°39'4"-069°59'0". This determination is made pursuant to Section 312(f)(3) of Public Laws 92-500, as amended by Public Law 95-217 and 100-4.
