#### SUPPLEMENTARY INFORMATION:

The purpose of the Draft EIR/EIS is to present BLM and Kern County's comparative analysis of the impacts of the Proposed Action and Alternatives on the physical, biological, social and economic resources of the area. The Proposed Action is a mining proposal to extract minerals from the subsurface, process the ore using chemical leaching methods and place the waste rock adjacent to the processing and mining areas. Alternatives to the Proposed Action include variations on the duration and placement of waste rock. After careful consideration of the impacts of the Proposed Action and all the alternatives, BLM has identified a Preferred Action in response to regulatory requirements, issues raised, resources present, impact analysis results and the effectiveness of mitigation and reclamation measures.

A public scoping process was initiated by the BLM and Kern County to identify issues and concerns relating to the proposed mining operation and assist the lead agencies in formulating alternatives to the Proposed Action. The scoping process was designed to provide an opportunity for receipt of verbal and written comments from the public organizations and government agencies. This was achieved through two public meetings, newspaper publications, **Federal Register** notice and notice of preparation of an EIR/EIS, Project description, resource inventories and public meeting proceedings were made available on the world wide web. Site can be reached with the following address: <http://www.ca.blm.gov/GoldenQueen>.

The project area includes approximately 1,690 acres of which 1,219 acres are privately owned land and 471 acres are unpatented mining claims on public lands administered by the BLM. The proposed surface disturbance is 930 acres of which 735 acres are on private land and 195 acres are on public land.

Five alternatives to the Proposed Action are analyzed in detail: (1) No Action, (2) Increased Mining and Processing Rate, (3) Decreased Mining and Processing Rate, (4) Reduced Project Size, and (5) Partial Backfilling.
