Bureau of Reclamation

Pajaro Valley Water Management Agency's Water Supply Project, Santa Cruz and Monterey Counties, California

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent to prepare a draft environmental impact statement and notice of scoping meetings.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA), the Bureau of Reclamation (Reclamation) proposes to prepare a draft environmental impact statement (DEIS) for Pajaro Valley Water Management Agency's (PVWMA) Water Supply Project. The PVWMA's Water Supply Project involves the use of diverse imported water supplies, including Central Valley Project (CVP) water supplies, within the PVWMA's service area (along the Central California Coast) for agricultural irrigation purposes and for the management of seawater intrusion into the Pajaro Valley groundwater basin. The action also includes the use of San Felipe Project facilities for the conveyance of imported water supplies to proposed PVWMA facilities and physical connection of an imported water supply to the San Felipe Project. Analysis of the use of imported water suppliers will be programmatic and will include water from diverse sources such as: State water project transfer, water rights purchase, and CVP transfer, contract, or contract assignment and purchase. This action will be evaluated in accordance with the legislative requirements of the Central Valley Project Improvement Act, the Warren Act, NEPA, and other relevant regulations. PVWMA is also preparing two environmental impact reports (EIR's) on the project, pursuant to the California Environmental Quality Act (CEQA).

DATES: Scoping meetings are proposed for the project. However, the schedule and location for these meetings have not as yet been determined. There will be ample notice given in the local papers of the times and locations of all scoping meetings.

FOR FURTHER INFORMATION CONTACT: Mr. Steve Edmondson, Bureau of Reclamation, South-Central California Area Office, 2666 N. Grove Industrial Drive, Suite 106, Fresno, CA 93727; telephone (209) 487-5049.

SUPPLEMENTARY INFORMATION: The PVWMA has identified and evaluated several water supply alternatives to meet its future water supply needs and manage seawater intrusion into the Pajaro Valley groundwater basin. These alternatives were evaluated in the Final Program Environmental Impact Report for the Basin Management Plan, under CEQA, State Clearing House No. 9302-3035, and certified in 1993. The findings and recommendations of this document will be incorporated by reference in preparation of site-specific analysis of the Water Supply Project components. The alternatives to be considered for this DEIS include:

- A long-term water supply contract for CVP water.
- The purchase and assignment of long-term CVP water supply contracts from willing sellers.
- Transfer of CVP water supply to PVWMA.
- The acquisition of imported water supplies from non-CVP sources possibly including the California State Water Project and purchase of water rights south of the Delta.

- No Action.

The alternatives to be considered at a site-specific level include:

- Use of San Felipe Project for conveyance of imported supplies and No Action.
- Physical connection of the proposed imported water supply pipeline to the San Felipe Project and No Action.

The imported water supply component of the water supply project will allow PVWMA to meet its projected annual water supply needs from various imported and local sources, including water conservation, managed groundwater pumping, development of local supplies, and importation of new supplies. Imported water supplies will be conveyed using the San Felipe Project facilities and the existing turnout on the San Felipe Project.

The PVWMA is preparing two EIR's. One EIR will analyze development of local water supply projects and a distribution system. The other EIR will analyze construction of an import water supply pipeline and a change in the place of use for CVP and other imported water rights.

The PVWMA held scoping meetings on the above water supply project environmental review documents on February 11, 12, and 13, 1997.

Dated: June 23, 1997.

Susan Kelly,

Acting Area Manager, South-Central California Area Office.
