DEPARTMENT OF DEFENSE

Office of the Secretary

Proposed Collection; Comment Request

AGENCY: Defense Technical Information Center, DOD.

ACTION: Notice.

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Defense Technical Information Center (DTIC) announces the initiation of a public information collection of its registered users and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by October 10, 1997.

ADDRESSES: Written comments and recommendations on the proposed information collection should be sent to: ATTN: DTIC–BCP, Defense Technical Information Center, 8725 John J. Kingman Road, Suite 0944, Fort Belvoir, VA 22060–6218.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the above address or call (703) 767–8267/DSN 427–8267.

Title, Associated Form, and OMB Number

Needs and Uses: The information collection is necessary to provide DTIC with satisfaction data about the timeliness, use, and quality of its products and services in order to establish a customer satisfaction baseline; assist in determining appropriate modifications to current products and services; and contribute to DTIC's product development efforts. It will allow DTIC to compile customer data which does not currently exist. Information gathered from discussions with customers is maintained in various nondigital formats but is not considered to be quantifiable in terms of customer satisfaction factors because of its anecdotal nature. Because DTIC offers 23 products and services to approximately 3,500 registered users, no cheaper method exists to collect this data other than a survey instrument. This survey is required to implement Executive Order 12862, 11 Sep 93, Setting Customer Service Standards, and the memorandum of the Secretary of Defense, 7 Jan 94, which directs the application of the principles of the Executive Order to all customers of the directors of all defense agencies; the Government Performance and Results Act (GPRA); and the DTIC Strategic Plan mandate to measure customer satisfaction of government-produced products and services.

Affected Public: All DTIC registered users who are Department of Defense (DoD) contractors and potential contractors; U.S. Government organizations and their contractors; and participants in the Small Business Innovation Research/Small Business, Technology Transfer, Historically Black Colleges and Universities, and University Research Support programs.

Annual Burden Hours: 20 hours (based on a 20% return rate).

Number of Respondents: Approximately 1,500.

Responses per Respondent: 1.

Average Burden per Respondent: 3 minutes.

Frequency: Annually, after baseline is established.

SUPPLEMENTARY INFORMATION: This survey is required to implement Executive Order 12862, 11 Sep 93, Setting Customer Service Standards; the memorandum of the Secretary of Defense, 7 Jan 94, which directs the application of the principles of the Executive Order to all customers of the directors of all defense agencies; the GPRA; and the DTIC Strategic Plan mandate to measure customer satisfaction of government-produced products and services.

The Executive Order 12862, 11 Sep 93, Setting Customer Service Standards, the memorandum of the Secretary of Defense, 7 Jan 94, and the GPRA of 1993, have as their purposes to improve the efficiency and effectiveness of Federal programs by requiring Government agencies to establish a system to set goals and measure program performance and program results. DTIC does not presently have a system established to gather data to measure program performance or program results in quantifiable terms against customer standards. Each agency is required to publish a customer service plan and make use of customer survey information to promote the principles and objectives of the executive order.

Under the GPRA, DTIC must set program goals and then publicly report on their progress toward achieving those goals in three stages:

a. By September 30, 1997, a five-year strategic plan for DTIC's programs. DTIC has developed such a plan. According to the GPRA, it will be submitted every 3 years, include a mission statement covering major functions and operations of the agency and general goals and objectives of the agency; the approach and necessary resources to be used in achieving those goals and objectives; any ''key external factors'' that might have a significant affect on DTIC's ability to achieve the general goals and objectives; and any program evaluations used in establishing or revising the goals and objectives (including plans for future evaluations).

b. By October 1, 1997, DTIC will be required to prepare an annual performance plan. The first plan will be
