

37,000 households are in the current panel.

The SIPP represents a source of information for a wide variety of topics and allows information for separate topics to be integrated to form a single, unified data base so that the interaction between tax, transfer, and other government and private policies can be examined. Government domestic policy formulators depend heavily upon SIPP information concerning the distribution of income received directly as money or indirectly as in-kind benefits, and the effect of tax and transfer programs on this distribution. They also need improved and expanded data on the income and general economic and financial situation of the U.S. population. The SIPP has provided these kinds of data on a continuing basis since 1983, permitting levels of economic well-being and changes in these levels to be measured over time.

The survey is molded around a central "core" of labor force and income questions that will remain fixed throughout the life of a panel. The core is supplemented with questions designed to answer specific needs, such as obtaining information about the terms of child support agreements and whether they are being fulfilled by the absent parent, examining the program participation status of persons with specific health and disability statuses, and obtaining detailed information needed to understand the current status of the employment-based health care system and changes that have occurred. These supplemental questions are included with the core and are referred to as "topical modules."

The topical modules for the 1996 Panel Wave 7 collect information about:

- (1) Annual Income & Retirement Accounts
- (2) Taxes
- (3) Retirement & Pension Plan Coverage
- (4) Home Health Care

Wave 7 interviews will be conducted from April 1998 through July 1998.

II. Method of Collection

The SIPP is designed as a continuing series of national panels of interviewed households that are introduced every 4 years, with each panel having a duration of 4 years in the survey. All household members 15 years old or over are interviewed using regular proxy-respondent rules. They are interviewed a total of 12 times (12 waves) at 4-month intervals, making the SIPP a longitudinal survey. Interviewers personally visit all households at least once a year and conduct the other 2 interviews by phone if the respondent

agrees. Sample persons (all household members present at the time of the first interview) who move within the country and reasonably close to a SIPP Primary Sampling Unit will be followed and interviewed at their new address. Persons 15 years old or over who enter the household after Wave 1 will be interviewed; however, if these persons move, they are not followed unless they happen to move along with a Wave 1 sample person.

The survey is administered using Computer-Assisted Personal Interviewing (CAPI) methodologies. Census Bureau field representatives collect the data from respondents using laptop computers, and the data are transmitted to Census Bureau headquarters via high-speed modems.

III. Data

OMB Number: 0607-0813.

Form Number: SIPP/CAPI Automated Instrument.

Type of Review: Regular.

Affected Public: Individuals or Households.

Foreign-Trade Zones Board

[Docket 69-97]

Foreign-Trade Zone 123—Denver, CO; Application for Subzone Status, Zytec Corporation Plant (Electric Power Supplies), Broomfield, CO

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City and County of Denver, Colorado, grantee of FTZ 123, requesting special-purpose subzone status for the electric power supply manufacturing plant of Zytec Corporation (Inc.), located in Broomfield, Colorado. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on August 22, 1997.

The Zytec plant (10 acres, 92,000 sq. ft.) is located at 2400 Industrial Lane in Broomfield (Boulder County), about 20 miles northwest of Denver. The plant (250 employees) is used to produce electric switch mode power supplies (HTSUS #8504.40.60) for the U.S. market and export. The power supplies are sold to manufacturers of data processing, communications, and electronic business equipment. The production process involves assembly, testing and warehousing. Components purchased from abroad (about 50% of total, by value) include: Diodes, semiconductors, transformers, thermostats, torroids, inductors, fans, batteries, circuit breakers, resistors, and capacitors (duty rate range: free—9.4%).

FTZ procedures would exempt Zytec from Customs duty payments on the foreign components used in the export production. On its domestic sales, the company would be able to choose the duty rate that applies to the power supplies (duty free) for the foreign inputs noted above. The application indicates that subzone status would help improve the international competitiveness of the Zytec plant.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is October 28, 1997. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to November 12, 1997.

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

Foreign-Trade Zones Board

[Docket 68-97]

Foreign-Trade Zone 119—Minneapolis, MN; Application for Subzone Status, Zytec Corporation Facilities (Electric Power Supplies), Redwood Falls, MN

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Greater Metropolitan Area Foreign Trade Zone Commission, Inc., grantee of FTZ 119 (Minneapolis, Minnesota, area), requesting special-purpose subzone status for the electric power supply manufacturing facilities of Zytec Corporation (Inc.), located in Redwood Falls, Minnesota. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on August 22, 1997.

The proposed subzone would consist of Zytec's manufacturing/warehousing facilities on two parcels located in Redwood Falls (Redwood County), Minnesota, some 80 miles southwest of Minneapolis: Parcel 1 (134,000 sq. ft. on 12 acres)—manufacturing/warehouse facilities, 1425 East Bridge Street, about one-half mile east of downtown Redwood Falls; Parcel 2 (46,000 sq. ft. on 4 acres)—manufacturing/warehouse

facilities, adjacent west of Parcel 1. The facilities (800 employees) are used to produce electric switch mode power supplies (HTSUS #8504.40.60) for the U.S. market and export. The power supplies are sold to manufacturers of data processing, communications, and electronic business equipment. The production process involves assembly, testing and warehousing.
