DEPARTMENT OF DEFENSE

Department of the Navy

Record of Decision

AGENCY: Department of Defense, Department of the Navy.

ACTION: Record of Decision to implement the sewage effluent compliance project for the Santa Margarita River Basin of Marine Corps Base, Camp Pendleton, California.

SUMMARY: Pursuant to Section 102(c) of the National Environmental Policy Act (NEPA) of 1969, and the Council of Environmental Quality Regulations (40 CFR parts 1500-1508), the Department of the Navy announces its decision to upgrade the wastewater treatment and disposal systems in the Santa Margarita River Basin of Marine Corps Base (MCB), Camp Pendleton, California. Upgrades in the Santa Margarita River Basin include the construction of a series of wastewater discharge flow percolation/equalization ponds inland from the coastline, and a connecting pipeline, approximately 98,000 total lineal feet, to connect sewage treatment plants 1, 2, 3, 8 and 13 to the La Salina ocean outfall, which is owned and operated by the City of Oceanside.

DATES: This action is effective immediately.

ADDRESSES: Mr. Lupe E. Armas, Assistant Chief of Staff, Environmental Security, Marine Corps Base, Camp Pendleton, CA 92055-5008.

FOR FURTHER INFORMATION CONTACT: Mr. Armas at (619) 725-4512.

SUPPLEMENTARY INFORMATION: Pursuant to Section 102(c) of the National Environmental Policy Act (NEPA) of 1969, and the Council on Environmental Quality Regulations (40 CFR parts 1500-1508), the Department of the Navy announces its decision to upgrade the wastewater treatment and disposal systems in the Santa Margarita River Basin of Marine Corps Base (MCB), Camp Pendleton, California. Upgrades in the Santa Margarita River Basin include the construction of a series of wastewater discharge flow percolation/

equalization ponds inland from the coastline, and a connecting pipeline, approximately 98,000 total lineal feet, to connect percolation/equalization ponds serving sewage treatment plants 1, 2, 3, 8 and 13 to the La Salina ocean outfall, which is owned and operated by the City of Oceanside. The project will be constructed in two phases. Phase one includes construction of new infrastructure linking facilities on Camp Pendleton. Phase two includes pipeline construction from the percolation/equalization ponds on Camp Pendleton to the La Salina Oceanside ocean outfall, as well as authorize execution of the utility service agreement contract with the City of Oceanside for the use of the outfall.

Sewage treatment plants 3 and 8 were constructed in the 1940's and currently discharge secondary treated effluent to percolation basins adjacent to the sewage treatment plants within a beneficial use portion of the lower Santa Margarita River Basin. Sewage treatment plant 1 was constructed in the 1940's and currently discharges secondary treated effluent to oxidation ponds and then as a surface discharge to the Santa Margarita River Basin at locations distant from the plant. Sewage treatment plant 2 was constructed prior to 1960 and currently discharges secondary effluent that is primarily diverted for irrigation use at the Marine Memorial Golf Course with any excess effluent discharged to the Santa Margarita River via a series of oxidation ponds, open channel trenches and pipelines. Sewage treatment plant 13 was constructed prior to 1960 and was designed to discharge secondary effluent via force main pipeline to percolation ponds in the lower Santa Margarita River, approximately 3 miles distant (upriver). The force main pipeline was damaged by the January 1993 flood; consequently sewage treatment plant 13 discharges secondary effluent directly to the Santa Margarita River at a location adjacent to the estuary.

Groundwater extracted from this basin serves developments within the southern portion of MCB Camp Pendleton. The current quality of effluent discharged into the Santa Margarita River Basin, from all plants, does not meet the standards of the 1994 San Diego Water Quality Basin Plan, the State of California Porter Cologne Water Quality Act of 1969, and the National Pollution Discharge Elimination System requirements of the Federal Water Pollution Control Act of 1972. As a result of these discharges, the San Diego Regional Water Quality Control Board issued Cease and Desist Orders to MCB Camp Pendleton in January 1989. To
