NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Elementary, Secondary and Informal Education; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Special Emphasis Panel in Elementary, Secondary and Informal Education (#59).

Date and Time: October 16, 17, 18, 1997, 8:30 a.m. to 5:00 p.m. each day.

Place: Room 375, 4201 Wilson Boulevard, National Science Foundation, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Dr. John S. Bradley, Program Director, Instructional Materials Development Programs, Division of Elementary, Secondary and Informal Education, National Science Foundation, Room 885, 4201 Wilson Boulevard, Arlington, VA 22230, Tel. (703) 306-1614).

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Instructional Materials Development proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature including technical information, financial data such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), the Government in the Sunshine Act.

Dated: August 29, 1997.

Rebecca Winkler,
Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Engineering; Committee of Visitors; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Advisory Committee for Engineering, (1170).

Date and time: September 24-26, 8:00 a.m.-5:00 p.m.

Place: Rm. 530,580, NSF, 4201 Wilson Boulevard, Arlington, VA.

Type of Meeting: Closed.

Contact Person: Dr. Gary Poehlein, Division Director, Division of Chemical and Transport Systems (CTS), Room 525 National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Telephone: (703) 306-1371.

Purpose of Meeting: To carry out Committee of Visitors (COV) review, including examination of decisions on proposals, reviewer comments, and other privileged materials.

Agenda: To provide oversight review of the Chemical and Transport Systems Division.

Reason for Closing: The meeting is closed to the public because the Committee is

reviewing proposal actions that will include privileged intellectual property and personal information that could harm individuals if they are disclosed. If discussions were open to the public, these matters that are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act would be improperly disclosed.

Dated: August 29, 1997.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-206, 50-361 and 50-362]

San Diego Gas and Electric Company (San Onofre Nuclear Generating Station, Units 1, 2 and 3); Order Approving Application Regarding the Corporate Restructuring of Enova Corporation, Parent of San Diego Gas and Electric Company, by Establishment of a Holding Company With Pacific Enterprises

I

San Diego Gas and Electric Company (SDG&E) is a co-owner of San Onofre Nuclear Generating Station (SONGS), Units 1, 2 and 3, along with Southern California Edison (SCE), The City of Riverside, California (Riverside), and The City of Anaheim, California (Anaheim). SDG&E, SCE, Riverside and Anaheim are co-holders of Possession Only License No. DPR-13, and Facility Operating License Nos. NPF-10, and NPF-15, issued by the U.S. Nuclear Regulatory Commission (the Commission) pursuant to Part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR Part 50) on October 23, 1992, February 16, 1982, and November 15, 1982, respectively. Under these licenses, SDG&E, SCE, Riverside, and Anaheim have the authority to possess the San Onofre Nuclear Generating Station, Units 1, 2 and 3, while SCE is authorized to operate Units 2 and 3. SONGS is located in San Diego County, California.

II

By letter dated December 2, 1996, SDG&E, through its counsel Richard A. Meserve of Covington & Burling, informed the Commission that its parent company, Enova Corporation was engaging in a corporate restructuring plan with Pacific Enterprises that will result in the creation of a holding company under the name Mineral Energy Company of which Enova and Pacific Enterprises would become

subsidiaries. SDG&E would continue to be a subsidiary of Enova. Under the restructuring, there will be no change in the capital structure of SDG&E. SDG&E will continue to hold the SONGS licenses to the same extent as presently held; there will be no direct transfer of the SONGS licenses. The December 2, 1996, letter requested the Commission's approval pursuant to 10 CFR 50.80, to the extent necessary, in connection with the proposed restructuring. Notice of this request for approval was published in the **Federal Register** on July 1, 1997 (62 FR 35532).

Under 10 CFR 50.80, no license shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission shall give its consent in writing. Upon review of the information submitted in the letter of December 2, 1996, and other information before the Commission, the NRC staff has determined that the restructuring of Enova, parent company of SDG&E, will not affect the qualifications of SDG&E as co-holder of the licenses, and that the transfer of control of the licenses for SONGS, to the extent effected by the restructuring of Enova, is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission, subject to the conditions set forth herein. These findings are supported by a Safety Evaluation dated August 29, 1997.

III

Accordingly, pursuant to Sections 161b, 161i, 161o, and 184 of the Atomic Energy Act of 1954, as amended, 42 U.S.C 2201(b), 2201(i), 2201(o), and 2234, and 10 CFR 50.80, *It Is Hereby Ordered* that the Commission approves the application concerning the proposed restructuring of Enova, parent company of SDG&E, subject to the following conditions: (1) SDG&E shall provide the Director of the Office of Nuclear Reactor Regulation a copy of any application, at the time it is filed, to transfer (excluding grants of security interests or liens) from SDG&E to its parent or to any other affiliated company, facilities for the production, transmission, or distribution of electric energy having a depreciated book value exceeding ten percent (10%) of SDG&E's consolidated net utility plant, as recorded on SDG&E's books of account; and (2) should the restructuring of Enova as described herein not be completed by August 31, 1998, this Order shall become null and void, provided, however, on application and for good cause shown, such date may be extended.

This Order is effective upon issuance.

IV

By October 6, 1997, any person adversely affected by this Order may file a request for a hearing with respect to issuance of the Order. Any person requesting a hearing shall set forth with particularity how that interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is to be held, the Commission will issue an order designating the time and place of such hearing.

The issue to be considered at any such hearing shall be whether this Order should be sustained.

Any request for a hearing must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Rulemaking and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, D.C. by the above date. Copies should be also sent to the Office of the General Counsel, and to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Richard A. Meserve, Covington & Burling, 1201 Pennsylvania Avenue, NW., Post Office Box 7566, Washington, D.C. 20044-7566, attorney for SDG&E.

For further details with respect to this action, see the December 2, 1996 letter application, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, D.C., and at the local public document room located at the Main Library, University of California, Irvine, California 92718.

Dated at Rockville, Maryland, this 29th day of August 1997.

For the Nuclear Regulatory Commission.

Samuel J. Collins,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Finding of No Significant Impact Related to Amendment to Materials License SMB-602, RMI Titanium Company

AGENCY: Nuclear Regulatory Commission.

ACTION: Finding of No Significant Impact Associated with Amendment to

Materials License SMB-602, RMI Titanium Company, Extrusion Plant, Ashtabula, Ohio, to Authorize Decommissioning of RMI Extrusion Plant Site.

The U.S. Nuclear Regulatory Commission is considering a license amendment request submitted by the RMI Titanium Company (hereafter RMI or the licensee) for decommissioning of its extrusion plant facility.

On August 28, 1995, NRC published a Notice of Consideration of Amendment Request for Decommissioning the RMI Titanium Company Site in Ashtabula, Ohio, and Opportunity for Hearing (60 FR 44517). NRC did not receive any response to that notice.

Summary of the Environmental Assessment

Identification of the Proposed Action

The proposed action is the decommissioning of RMI's extrusion plant facility in Ashtabula, Ohio, in accordance with RMI's decommissioning plan submitted April 27, 1995 (DP) and supplemental submittals. In this action, RMI is proposing to remediate the extrusion plant site for release for unrestricted use consistent with the NRC "Action Plan to Ensure Timely Cleanup of Site Decommissioning Management Plan Sites" (57 FR 13389; April 16, 1992; hereafter Action Plan). Decommissioning activities would include decontamination and dismantlement of the extrusion plant equipment and buildings (D&D), remediation of contaminated soils and groundwater, restoration of affected areas, and offsite disposal of radioactive decommissioning wastes (primarily uranium). Most radioactive wastes from decommissioning activities will be Class A low-level radioactive waste (LLW).

The release criterion for total uranium in soil is 1.1 Bq (30 pCi)/g. Release criteria for groundwater are: total uranium, 1.1 Bq (30 pCi)/l; and technetium-99 (Tc-99), 33.3 Bq (900 pCi)/l. Clarification of these criteria for groundwater is provided in a staff note to the docket file.

Uranium residues in various physical forms (such as metal turnings and uranium oxide dust) were generated under contract to the U.S. Department of Energy (DOE) and under NRC license SMB-602. As a consequence of those operations, the process and support buildings, onsite and adjacent offsite soils, and groundwater near a former evaporation pond are known to be contaminated with uranium (uranium-234, uranium-235, and uranium-238) at
