

turn the gas control valve to the "OFF" position when the heater is not in use.

Requiring the inclusion of pilot energy input in the A.F.U.E. calculations does not allow for the additional energy savings realized when the pilot light is turned off. We request that the requirement of including the term involving the pilot energy consumption be waived from the A.F.U.E. calculation for our heaters noted above.

Waivers for deleting pilot energy consumption in A.F.U.E. calculations have previously been granted by U.S.D.o.E. to other manufacturers. We are requesting U.S.D.o.E. grant Wolf Steel Ltd. this same waiver.

Please contact us with any questions, comments, and requirements for additional information we can provide. Thank you for your help in this matter.
