

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau has made the development of user-friendly forms a key strategy to reduce respondent burden. The five-person questionnaire with a continuation roster to list up to seven additional individuals is shorter than a comparable seven-person detailed version. For this reason, the decision to adopt a five person detail/twelve person roster mail-out questionnaire is expected to lessen the public perception that responding to the census is an arduous task. The objective of the Census 2000 Dress Rehearsal Large Household Follow-up is to acquire detailed characteristic data for households with more than five members. The Census Bureau will accomplish this by performing follow-up activities for larger households which list additional household members on the census original questionnaire roster.

II. Method of Collection

The methodology selected for the Census 2000 Dress Rehearsal Large Household Follow-up is to mail a customized questionnaire package to those specific households which listed six or more individuals on the original questionnaire. The customized mailing package will consist of the following items.

1. An outgoing envelope addressed to either the respondent name reported on the original returned questionnaire or the Person 1 name.
2. A letter listing the names of all persons on the original questionnaire for whom detailed characteristics were provided and the names of all persons listed on the roster. The letter will request the respondent provide detailed characteristics for the additional individuals listed on the roster.
3. A continuation questionnaire designed for Person 6 through Person 12.
4. A Business Reply Mail return envelope for the respondent to return the continuation questionnaire.

Only one follow-up mailing will be conducted for each identified large household. No personal visit or telephone follow-up is planned.
