**50 CFR Part 648**

[Docket Nos. 970214031-7031-01, I.D. 011697C and 970324064-7064-01, I.D. 021997B]

**Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Framework Adjustment 16; Framework Adjustment 23; Correction**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Correction to final rules.

**SUMMARY:** On March 3, 1997, NMFS published a final rule to implement

measures contained in Framework Adjustment 16 to the Northeast Multispecies Fishery Management Plan (FMP) and on April 1, 1997, NMFS published a final rule to implement measures contained in Framework Adjustment 23 to the Northeast Multispecies FMP. Because of the effective dates of the implementing regulations for both of these frameworks, Framework Adjustment 16 regulatory text inadvertently superseded Framework Adjustment 23 regulatory text. This action corrects those sections of the regulatory text inadvertently superseded by Framework Adjustment 16.

**DATES:** Effective April 2, 1997.

**FOR FURTHER INFORMATION CONTACT:** Mary Tokarcik, (978) 281-9300.

**SUPPLEMENTARY INFORMATION:**

**Background**

On March 3, 1997 (62 FR 9377), NMFS published a final rule implementing measures contained in Framework Adjustment 16 to the Northeast Multispecies FMP. This rule prohibited the use of all gillnets capable

of catching Northeast multispecies during the periods to which the harbor porpoise time/area closures are in effect, unless the gillnet meets certain specifications. The intent of this action was to restrict the use of small-mesh pelagic gillnets, which were exempt from the multispecies regulations, to avoid increasing the risk of harbor porpoise entanglements, but still allow a traditional bait fishery to continue by specifying the size and method of deployment of the gear. That final rule became effective on April 2, 1997.

On April 1, 1997 (62 FR 15425), NMFS published a final rule that closed Federal waters during specified periods to vessels fishing with sink gillnet gear and other gillnet gear capable of catching multispecies, with the exception of single pelagic gillnets in parts of the specified right whale critical habitats areas. The intent of the action was to restrict multispecies fishing activities which have been determined to jeopardize the continued existence of the northern right whale. That final rule became effective upon filing on March 27, 1997.

**Need for the Correction**

The final rules published in the **Federal Register** on March 3 and April 1, 1997, both amended §§ 648.14(a)(89) and 648.87 (a) and (b). NMFS' intent was to have the rule published on April 1 for Framework Adjustment 23 supersede portions of the measures contained in the rule published on March 3 for Framework Adjustment 16. However, due to an administrative oversight, the rule implementing the management measures contained in Framework Adjustment 23 became effective on March 27, 1997, prior to the effective date (April 2, 1997) of the final rule implementing the management measures contained in Framework Adjustment 16. Therefore, portions of the regulations implementing Framework Adjustment 16 unintentionally superseded the regulations implementing Framework Adjustment 23.

Effective April 2, 1997, this document corrects the regulatory text contained in portions of the March 3 rule (Framework Adjustment 16) to reflect the appropriate regulatory language from the April 1 rule (Framework Adjustment 23). Therefore, this document corrects §§ 648.14(a)(89) and 648.87 section heading and paragraphs (a) and (b) heading and introductory text to restore that text to that intended by NMFS.

**Correction**

Accordingly, publication on March 3, 1997, of the final regulations (I.D. 011697C), which was the subject of FR Doc. 97-4907, is corrected as follows:

On page 9379, in the first column, under amendatory instruction 3, in § 648.14, paragraph (a)(89) is corrected to read as follows:

**§ 648.14 Prohibitions.**

(a) \* \* \*

(89) Fail to remove, use, set, haul back, fish with, or possess on board a vessel, unless stowed in accordance with § 648.81(e)(4), sink gillnet gear and other gillnet gear capable of catching multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)), in the areas and for the times specified in § 648.87 (a) and (b), except as provided in §§ 648.81(f)(2)(ii) and 648.87 (a) and (b), or unless otherwise authorized in writing by the Regional Administrator.

\* \* \* \* \*

On page 9379, in the second column, amendatory instruction 5 and the regulatory text are corrected to read as follows:

5. Section 648.87 is amended by revising the section heading and paragraphs (a) and (b) to read as follows:

**§ 648.87 Gillnet requirements to reduce or prevent marine mammal takes.**

(a) *Areas closed to gillnet gear capable of catching multispecies to reduce harbor porpoise takes.* Sections 648.81(f) through (h) set forth closed area restrictions to reduce the take of harbor porpoise consistent with the harbor porpoise mortality reduction goals. Further, all persons owning or operating vessels in the EEZ portion of the areas and times specified in paragraphs (a) (1) and (2) of this section must remove all of their sink gillnet gear and other gillnet gear capable of catching multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)), and may not use, set, haul back, fish with, or possess on board, unless stowed in accordance with the requirements of § 648.81(e)(4), sink gillnet gear or other gillnet gear capable of catching multispecies, with the exception of single pelagic gillnet gear (as described in § 648.81(f)(2)(ii)) in the EEZ portion of the areas and for the times specified in paragraphs (a) (1) and (2) of this section. Also, all persons owning or operating vessels issued a limited access multispecies permit must remove all of their sink gillnet gear and other gillnet gear capable of catching multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)), from the areas and for the times specified in paragraphs (a) (1) and (2) of this section, and, may not use, set, haul back, fish with, or possess on board, unless stowed in accordance with the requirements of § 648.81(e)(4), sink gillnets or other gillnet gear capable of catching multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)) in the areas and for the times specified in paragraphs (a) (1) and (2) of this section.

(1) *Mid-coast Closure Area.* (i) From March 25 through April 25 and from September 15 through December 31 of each fishing year, the restrictions and requirements specified in paragraph (a) of this section apply to the Mid-coast Closure Area, as defined under § 648.81(g)(1), except as provided in paragraph (a)(1)(ii) of this section.

(ii) Vessels subject to the restrictions and regulations specified in paragraph (a) of this section may fish in the Mid-coast Closure Area, as defined under § 648.81(g)(1), from November 1 through December 31 of each fishing year, provided that an acoustic deterrent device ("pinger") is attached at the end of each string of nets and at the bridle

of every net within a string of nets, and is maintained as operational and functioning. Each pinger, when immersed in water, must broadcast a 10kHz +/- 2kHz sound at 132 dB +/- 4dB re 1 micropascal at 1 m. This sound must last 300 milliseconds and repeat every 4 seconds.

(2) *Cape Cod South Closure Area.* From March 1 through March 30 of each fishing year, the restrictions and requirements specified in paragraph (a) of this section apply to the Cape Cod South Closure Area (copies of a chart depicting this area are available from the Regional Administrator upon request), which is the area bounded by straight lines connecting the following points in the order stated.

**CAPE COD SOUTH CLOSURE AREA**

Point	N. latitude	W. longitude
CCS1 .....	( <sup>1</sup> )	71°45' W
CCS2 .....	40°40' N	71°45' W
CCS3 .....	40°40' N	70°30' W
CCS4 .....	( <sup>2</sup> )	70°30' W

<sup>1</sup> RI Shoreline.  
<sup>2</sup> MA Shoreline.

(b) *Areas closed to gillnet gear capable of catching multispecies to prevent right whale takes.* All persons owning or operating vessels must remove all of their sink gillnet gear and gillnet gear capable of catching multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)), from the EEZ portion of the areas and for the times specified in (b)(1) and (2) of this section, and may not use, set, haul back, fish with, or possess on board, unless stowed in accordance with the requirements of § 648.81(e)(4), sink gillnet gear or gillnet gear capable of catching multispecies, with the exception of single pelagic gillnet gear (as described in § 648.81(f)(2)(ii)) in the EEZ portion of the areas and for the times specified in paragraphs (b)(1) and (2) of this section.

(1) *Cape Cod Bay Critical Habitat Closure Area.* From March 27, 1997 through May 15, 1997 and from January 1 through May 15 of each subsequent year, the restrictions and requirements specified in paragraph (b) of this section apply to the Cape Cod Bay Critical Habitat Closure Area (copies of a chart depicting this area are available from the Regional Administrator upon request), which is the area bounded by straight lines connecting the following points in the order stated.

CAPE COD BAY CRITICAL HABITAT CLOSURE AREA

Point	N. latitude	W. longitude
CCB1 .....	42°12' N	70°30' W
CCB2 .....	42°12' N	70°15' W
CCB3 .....	42°08' N	70°12.4' W
Then westerly along the 3 NM state boundary to		
CCB4 .....	42°08' N	70°30' W
Then due north to CCB1		

(2) *Great South Channel Critical Habitat Closure Area.* From April 1 through June 30 of each year, the restrictions and requirements specified in paragraph (b) of this section apply to the Great South Channel Critical Habitat Closure Area (copies of a chart depicting this area are available from the Regional Administrator upon request), which is the area bounded by straight lines connecting the following points in the order stated.

GREAT SOUTH CHANNEL CRITICAL HABITAT CLOSURE AREA

Point	N. latitude	W. longitude
GSC1 .....	41°02.2' N	69°02' W
GSC2 .....	41°43.5' N	69°36.3' W
GSC3 .....	42°10' N	68°31' W
GSC4 .....	41°38' N	68°13' W

[Docket No. 961210346-7035-02; I.D. 100197A]

Fisheries of the Northeastern United States; Summer Flounder Fishery; Commercial Quota Available for New Jersey

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Commercial quota availability.

**SUMMARY:** NMFS announces that summer flounder commercial quota is available to the State of New Jersey to

allow a reopening of the State to landings of summer flounder. Vessels issued a commercial Federal fisheries permit for the summer flounder fishery may resume landings of summer flounder in New Jersey for the remainder of calendar year 1997, or until the remaining quota allocation is harvested.

**DATES:** Effective October 3, 1997 through December 31, 1997.

**FOR FURTHER INFORMATION CONTACT:** Regina L. Spallone, Fishery Policy Analyst, (978) 281-9221.

**SUPPLEMENTARY INFORMATION:** Regulations governing the summer flounder fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is apportioned among the states from North Carolina through Maine. The process to set the annual commercial quota and the percent allocated to each state are described in § 648.100. The initial total commercial quota for summer flounder for the 1997 calendar year was set equal to 11,111,298 lb (5,040,000 kg) (62 FR 10473, March 7, 1997). The percent allocated to vessels landing summer flounder in New Jersey is 16.72499 percent, or 1,858,363 lb (842,939 kg) in 1997. After deducting a 510,771 lb (231,682 kg) overage landed in 1996, as specified in section 648.100(d)(2), New Jersey was left with an adjusted 1997 commercial quota of 1,347,592 lb (611,257 kg) (62 FR 37741, July 15, 1997). Section 648.101(b) requires the Administrator, Northeast Region, NMFS (Regional Administrator), to monitor state commercial quotas and to determine when a state's commercial quota is harvested. Based on dealer reports and other available information, the Regional Administrator determined that the commercial quota available to New Jersey had been harvested, and no quota was available for that State for the remainder of 1997. Thus, effective September 24, 1997 (62 FR 50525, September 26, 1997), summer flounder landings in the State of New Jersey by federally permitted vessels, and purchases by federally permitted dealers, were prohibited for the remainder of 1997. The closure of the State to landings was based on projections of landings from dealer reports. However, due to State action to control landings through trip limits, actual landings have fallen short of projections. Specifically, prior to the NMFS closure, New Jersey closed its directed fishery and landings dropped off significantly. The State now has a bycatch trip limit in place for the remainder of the year (10 percent of total fish on board, up to a maximum of

100 lb/trip (45 kg/trip) until November 1st; 200 lb/trip (91 kg/trip) after that date). Thus, available data indicate that approximately 50,000 lb (22,680 kg) remain in New Jersey's annual commercial quota of 1,347,592 lb (611,257 kg). Since summer flounder commercial quota is available to New Jersey to be harvested, and in order to allow the State to receive the full benefit of its annual allocation of quota, the closure, published on September 26, 1997, is rescinded.

**Classification**

This action is required by 50 CFR part 648 and is exempt from review under E.O. 12286.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: October 2, 1997.

**Gary Matlock,**

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in the Offshore Component in the Bering Sea Subarea

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Inseason adjustment; request for comments.

**SUMMARY:** NMFS issues an inseason adjustment closing the season for pollock by vessels catching pollock for processing by the offshore component in the Bering Sea subarea (BS) of the Bering Sea and Aleutian Islands management area (BSAI) at midnight rather than noon. This adjustment is necessary to prevent the underharvest of pollock by vessels catching pollock for processing by the offshore component in the BS of the BSAI.

**DATES:** Effective 2400 hrs, Alaska local time (A.l.t.), October 2, 1997, until 2400 hrs, A.l.t., December 31, 1997.

Comments must be received at the following address no later than 4:30 p.m., A.l.t., October 22, 1997.

**ADDRESSES:** Comments may be sent to Chief, Fisheries Management Division,
