FOR FURTHER INFORMATION CONTACT: For a copy of the ICR, call Sandy Farmer at EPA, (202) 260–2740, or download off the Internet at http://www.epa.gov/icr/icr.htm and refer to EPA ICR No. 1611.03.

#### SUPPLEMENTARY INFORMATION:

Title: National Emission Standards for Chromium Emissions from Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks (OMB Control No.2060–0327; EPA ICR No 1611.03), expiring 12/31/97. This is a request for extension of a currently

approved collection.

Abstract: The Administrator has judged that Hazardous Air Pollutants (HAP) emissions from chromium emissions from hard and decorative chromium electroplating and chromium anodizing tanks cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Owners/operators of affected hard and decorative chromium electroplating and chromium anodizing operations must notify EPA of construction, modification, startups, shut downs, date and results of initial performance test and provide reports of excess emissions. They must also develop startup, shutďown, malfunction plans and develop an operation and maintenance plan for their control system. Affected facilities also must provide notification of compliance status and report monitoring exceedances.

In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on June 18, 1997 and no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 15 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the

time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Operators of Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks.

Estimated Number of Respondents: 948.

Frequency of Response: 2.

Estimated Number of Responses: 1896.

Estimated Total Annual Hour Burden: 516,186 person hours.

Estimated Total Annualized Cost Burden: \$75,300,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1611.03 and OMB Control No. 2060–0327 in any correspondence.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-5913-1]

Agency Information Collection
Activities: Submission for OMB
Review; Comment Request; National
Emission Standards for Hazardous Air
Pollutants (NESHAP) for Commercial
Ethylene Oxide Sterilization and
Fumigation Operations

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), this notice announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Reporting and Recordkeeping Requirements for the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Commercial Ethylene Oxide Sterilization and Fumigation Operations, OMB Control Number 2060–0283, expiration date December 31, 1997. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before November 24, 1997.

FOR FURTHER INFORMATION CONTACT: Call Sandy Farmer at EPA, (202) 260–2740, or download off the Internet from http://www.epa.gov/icr/icr.htm and refer to EPA ICR No. 1666.03.

#### SUPPLEMENTARY INFORMATION:

Title: NESHAP Subpart O: National Emission Standards for Hazardous Air Pollutants (NESHAP) for Commercial Ethylene Oxide Sterilization and Fumigation Operations (OMB Control No. 2060–0283; EPA ICR No. 1666.03) expiring 12/31/97. This is a request for extension of a currently approved collection.

Abstract: The Agency is required under section 112(d) of the Clean Air Act, as amended, to regulate emissions of hazardous air pollutants listed in section 112(b).

In the Administrator's judgement, ethylene oxide (EO) emitted from commercial EO sterilization and fumigation operations causes, or contributes significantly to air pollution that may reasonably be anticipated to endanger public health or welfare. Consequently, the NESHAP for EO emissions have been developed for this source category.

Certain records and reports are necessary to enable the Administrator to: (1) identify new, modified, reconstructed, and existing sources subject to the standards and (2) ensure that the standards, which are based on maximum achievable control technology (MACT) and generally available control technology (GACT), are being achieved.

The NESHAP for Commercial Ethylene Oxide Sterilization and Fumigation Operations were promulgated on December 6, 1994. These standards apply to new and existing commercial EO sterilization and fumigation facilities that use air pollution control devices that are in operation after promulgation of the NESHAP.

Owners or operators of the affected facilities described must submit one-time reports of start of construction, anticipated or actual startup dates, and physical or operation changes to existing facilities. In addition, owners or operators of existing commercial EO sterilization and fumigation operations will submit one-time reports of actual annual EO use. Owners or operators of new commercial EO sterilization and fumigation operations will submit one-time reports of estimated annual EO use.

Reports of initial emissions testing are necessary to determine that the applicable emission limit is being met. The owner or operator of a commercial EO sterilization and fumigation operation that uses an air pollution control device to meet the emission limit is required to maintain records of the site-specific monitoring parameters as well as daily and monthly inspections of the control device.

All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office. Notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. The reviewing authority may then inspect the source to check if the pollution control devices are properly installed and operated and the standard is being met. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection

of information was published on 6/18/97 (62 FR 33068); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 75 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Commercial Ethylene Oxide Sterilization and Fumigation Operations.

Estimated Number of Respondents: 98.

Frequency of Response: Daily, Monthly, and Semi-annually.

Estimated Total Annual Hour Burden: 7,328 hours.

Estimated Total Annualized Cost Burden: \$228,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1666.03 and OMB Control No. 2060–0283 in any correspondence.

[FRL-5912-8]

#### Public Meetings Regarding Environmental Information

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of public meetings and opportunity for public comment.

**SUMMARY:** The United States Environmental Protection Agency (EPA) is announcing a series of public meetings to solicit information from stakehodlers regarding their use of, and access to, environmental information and data.

DATES: EPA is scheduling up to twenty public meetings during October 1997 through December 1997. Specific dates and cities are listed in the tentative schedule under Supplementary Information below. Requests to attend the meetings and/or provide oral comments at the meetings must be received at least 7 days prior to the scheduled meetings. The final times and precise locations of the meetings will be available to interested persons from the EPA contact person, upon request, two weeks prior to each meeting.

ADDRESSES: Requests to attend the meetings and/or to provide oral comments should be made to Ms. Lisa M. Hunter; Center for Environmental Information and Statistics (MC: 2164); Office of Policy, Planning and Evaluation; U.S. Environmental Protection Agency; 401 M Street, SW; Washington, DC; 20460; (202) 260–4744.

FOR FURTHER INFORMATION CONTACT: Ms. Lisa M. Hunter, EPA Headquarters, (202) 260–4744, or e-mail, hunter.lisa@epamial.epa.gov.

SUPPLEMENTARY INFORMATION: EPA is undertaking a variety of customer survey efforts to learn how Agency stakeholders use and access environmental information and data. One of these efforts will consist of a series of twenty meetings throughout the country to better understand the views of particular individuals and groups that typically use environmental information. Each discussion session will focus on a particular stakeholder group or user's environmental information needs. The public is invited to attend these meetings as observers and/or to provide comment during a public comment period at the end of each meeting. The tentative schedule for the public meetings—including potential dates, cites, and intended stakeholder groups—is as follows:
