

implement the broad management goals of the MMPA, Magnuson-Stevens Fishery Conservation and Management Act, and the Atlantic Tunas Convention Act.

*Alternative 3: Modified Plan, with Marine Mammal Bycatch Limit for the Drift Gillnet Fishery*

This alternative would modify the Team's draft plan to include a marine mammal bycatch limit for the drift gillnet fishery. Under this alternative, the following combination of measures are proposed for the drift gillnet fishery: (1) Limited entry to the drift gillnet fishery, (2) prohibition of drift gillnet gear south of Hudson Canyon year-round, (3) prohibition on the use of drift gillnet gear from November 1 through July 31, (4) 100 percent marine mammal observer coverage, (5) mandatory education workshops for all vessel operators, and (6) a per-vessel marine mammal bycatch limit. The longline fishery would be subject to the same regulations specified in Alternative 2, with the following exceptions: (1) The areas subject to regulation would be expanded to include the Northeast Coastal area and (2) educational workshops would be mandatory for all vessel operators.

*Alternative 4: Modified Plan, with Prohibition of Drift Gillnet Gear*

This alternative would modify the team's draft plan to include a ban on the use of drift gillnet gear to target swordfish, tuna, and shark, except where otherwise authorized (i.e., the southeast U.S. shark gillnet fishery). This alternative would adopt the longline fishery take reduction strategies outlined in Alternative 3.
