

Company, P.O. Box 222, Port Townsend, WA 98368, (360) 385-1733. Alan D. See, Goat Lake Hydro, Inc., P.O. Box 459, Skagway, AK 99840, (907) 983-2902.

i. *FERC Contact*: Regina Saizan, (202) 219-2673.

j. *Comment Date*: December 26, 1997.  
k. *Description of the Request*: The purpose of the transfer to Goat Lake Hydro, Inc. is to facilitate the development and financing of the project.

1. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protects, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

**Lois D. Cashell,**

*Secretary.*

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-5924-2]

### Agency Information Collection Activities: Submission for OMB Review; Comment Request; NSPS for Stationary Gas Turbines

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: NSPS (Subpart GG) for Stationary Gas Turbines; OMB Control Number 2060-0028; expiring 1/31/98. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before December 19, 1997.

**FOR FURTHER INFORMATION CONTACT:** For a copy of the ICR, call Sandy Farmer at EPA, by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download off the Internet at <http://www.epa.gov/icr/icr.htm>, and refer to EPA ICR No. 1071.06.

#### SUPPLEMENTARY INFORMATION:

**Title:** NSPS (Subpart GG) for Stationary Gas Turbines; OMB Control Number 2060-0028; EPA ICR No. 1071.06; expiring 1/31/98. This is a request for extension of a currently approved collection.

**Abstract:** NSPS for stationary gas turbines (GG) were promulgated on September 10, 1979 to regulate the emissions of Nitrogen Oxide (NO<sub>x</sub>) and Sulfur Dioxide (SO<sub>2</sub>) into the ambient air supply. The EPA is charged under section 111 of the Clean Air Act of 1990, as amended, to establish these standards for new stationary sources that reflect application of the best demonstrated technology. In addition, section 114(a) of the Clean Air Act provides for monitoring, recordkeeping, and reporting requirements for these standards.

*Owner/operators of affected facilities must make one-time only reports which include the following notifications:* date of construction/reconstruction; anticipated and actual dates of start-up; any physical or operational change which may increase the SO<sub>2</sub> or NO<sub>x</sub> emission rates; commencement date for the continuous monitoring system

performance demonstration; and date and results of the initial performance test. Plant owner/operators must also provide semi-annual reports of excess emissions, as promulgated in the December 13, 1990 **Federal Register** (55 FR 51378).

Owner/operators must maintain records of the occurrence and duration of any start-up, shutdown, or malfunction in operations, or any periods during which the monitoring system is inoperative. Recordkeeping is also required to document process information regarding the: sulfur and nitrogen content of the fuel; fuel:water ratio; rate of fuel consumption; and ambient conditions. This latter recordkeeping function involves daily measurements from the continuous monitoring system to monitor ambient conditions, and to record the fuel consumption and the ratio of water to fuel being fired in the turbine only for plants which use water or steam injection to control NO<sub>x</sub> emissions. There is generally no additional burden on the owner/operator to provide this information because adequate recordkeeping is required of plant operations.

It is important to note that if these data and reports are not collected, the Agency has no means for ensuring that compliance with the standards is being achieved and/or maintained by the new, modified, or reconstructed sources which are subject to regulation. In the absence of information collection requirements, compliance with the standards could be ensured only through continuous on-site inspections by regulatory agency personnel. Consequently, not collecting the information would result in either greatly increased expenditures of resources, or the inability to ensure compliance with the standards. In addition to the purposes mentioned above, this kind of information is used for targeting plants for inspections and as evidence when compliance cases are taken to court.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. Any information submitted to the Agency for which a claim of confidentiality is requested will be safeguarded according to the Agency policies set forth in Title 40, chapter 1, part 2, subpart B: Confidentiality of Business Information (see 40 CFR 2; 41 FR 36902, September 1, 1976; amended by 43 FR 39999, September 8, 1978; FR

42251, September 28, 1978; 44 FR 17674, March 23, 1979). The **Federal Register** notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 8/20/97; No comments were received.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 51 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Plant owner/operators of stationary gas turbines.

**Estimated Number of Respondents:** 625

**Frequency of Response:** Annual notification reports, and semi-annual emission reports.

**Estimated Total Annual Hour Burden:** 76,681.

**Estimated Total Annualized Cost Burden:** 0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1071.06 and OMB Control No. 2060-0028 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460 and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: November 13, 1997.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-5924-4]

### New York State Prohibition on Marine Discharges of Vessel Sewage; Final Affirmative Determination

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** Notice is hereby given that the Regional Administrator, Environmental Protection Agency (EPA) Region II has affirmatively determined, pursuant to section 312(f) of Pub. L. 92-500, as amended by Pub. L. 95-217 and Pub. L. 100-4, (the Clean Water Act), that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the coastal waters of Mamaroneck Harbor, Village of Mamaroneck, County of Westchester, State of New York.

A petition was made by the New York State Department of Environmental Conservation (NYSDEC) in cooperation with the Village of Mamaroneck. Upon receipt of this affirmative determination in response to this petition, NYSDEC will completely prohibit the discharge of sewage, whether treated or not, from any vessel in Mamaroneck Harbor in accordance with section 312(f)(3) of the Clean Water Act and 40 CFR 140.4(a). Notice of the Receipt of Petition and Tentative Determination was published in the **Federal Register** on July 16, 1997. Comments on the tentative determination were accepted during a 30-day period which closed on August 15, 1997. No comments were received.

The Village of Mamaroneck is located on Long Island Sound. Mamaroneck Harbor encompasses numerous wetlands, marshes and mud flats including Guion Creek, Otter Creek, Salt Creek and Van Amringe Mill Pond. The No-Discharge Zone includes waters not indexed lying northerly of a line drawn in a northeasterly direction from the southern tip of the sea wall at Orienta Point near the Orienta Yacht Club at the foot of Rushmore Avenue in Mamaroneck, to a point on the mainland immediately north of Spike Island at the intersection of the shoreline and the extension of the line to the center gable of large stone and stucco residence at No. 6 Shore Road in the Greenhaven section within the City of Rye.

Information submitted by the State of New York and the Village of Mamaroneck states that there are three existing pump-out facilities available to service vessels which use Mamaroneck

Harbor, and one additional facility proposed for construction. One facility is owned and operated by the Mamaroneck Municipal Marina. This facility is open continuously and charges no fee for pump-out services. It can service vessels up to 80 feet in length with up to a 8 foot draft based on the mean low water depth. A second unit is planned at this facility with the same operating schedule.

The other facilities are privately owned and charge no fee for pump-out services to patrons. They are located at Nichols Boat Yard and Boston Post Road Boat Yard. Operating hours for Nichols Boat Yard pump-out are 0900 to 1700 hours, Monday through Friday and by appointment on the weekend. It can service vessels up to 40 feet in length with up to a 6 foot draft based on the mean low water depth. The other facility is located at the Boston Post Road Boat Yard and operates from 0830 to 1630 Monday through Friday. Length and draft restrictions are 50 feet and 5.1 feet based on mean low water depth. Within seven nautical miles of Mamaroneck Harbor are five other locations that provide pump-out facilities.

Vessel waste generated from the pump-out facilities in Mamaroneck Harbor is disposed of in the Village of Mamaroneck Waste Water Treatment Plant. This plant operates under a State Pollutant Discharge Elimination System (SPDES) permit issued by the New York State Department of Environmental Conservation.

According to the State's petition, the maximum daily vessel population for the waters of Mamaroneck Harbor is approximately 1160 vessels. This estimate is based on summer weekend/holiday levels of usage and includes 1040 vessels berthed in marinas of Mamaroneck Harbor and less than 120 transient vessels in Mamaroneck Harbor.

The EPA hereby makes a final affirmative determination that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for Mamaroneck Harbor in the Village of Mamaroneck, New York. A final determination on this matter has been made and will result in a New York State prohibition of any sewage discharges from vessels in Mamaroneck Harbor.

Dated: November 4, 1997.

**William J. Muszynski,**

*Acting Regional Administrator.*
