

Islands National Park in the U.S. Virgin Islands) propose to conduct visitor surveys to learn about visitor demographics and visitor opinions about services and facilities in each of these three parks. The results of the surveys will be used by park managers to improve the services they provide to visitors while better protecting park natural and cultural resources. Study packages that include the proposed survey questionnaires for these three proposed park studies have been submitted to the Office of Management and Budget for review.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1995 and 5 CFR Part 1320, Reporting and Record Keeping Requirements, the NPS invites public comment on these three proposed information collection requests (ICR). Comments are invited on: (1) the need for the information including whether the information has practical utility; (2) the accuracy of the reporting burden estimate; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the information collection on respondents, including the use of automated collection techniques or other forms of information technology.

The purpose of the three proposed ICRs is to document the demographics of visitors to the three parks, to learn about the motivations and expectations these visitors have for their park visits, and to obtain their opinions regarding services provided by the three parks and the suitability of the visitor facilities maintained in the three parks. This information will be used by park planners and managers to plan, develop, and operate visitor services and facilities in ways that maximize use of limited park financial and personnel resources to meet the expectations and desires of park visitors.

There were no public comments received as a result of publishing in the Federal Register a 60 day notice of intention to request clearance of information collection for these three surveys.

**DATES:** Public comments will be accepted for thirty days from the date listed at the top of this page in the Federal Register.

## NUCLEAR REGULATORY COMMISSION

### Agency Information Collection Activities: Proposed Collection; Comment Request

**AGENCY:** U. S. Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of pending NRC action to submit an information collection

request to OMB and solicitation of public comment.

**SUMMARY:** The NRC is preparing a submittal to OMB for review and approval of a new information collection under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: Joint NRC/EPA Survey of Sewage Sludge/Ash.
2. Current OMB approval number: None.
3. How often the collection is required: This is a one-time collection.
4. Who is required or asked to report: Selected publicly owned treatment works (POTWs), and Agreement States.
5. The number of annual respondents: 600 POTWs for the questionnaire, and 300 POTWs for sample collection, plus 29 Agreement States for reporting of Zip Codes.
6. The number of hours needed annually to complete the requirement or request: An average of 2 hours per respondent for questionnaires and 6 hours each for selected respondents for collecting samples, plus 8 hours each for 29 Agreement States. The total burden is 3,232 hours.

7. Abstract: The survey will obtain national estimates of the levels of radioactive materials in sludge and ash at POTWs, estimate the extent to which radioactive contamination comes from either NRC/Agreement State licensees or from naturally occurring radioactivity, and support possible rulemaking decisions by NRC and EPA. NRC and EPA will send questionnaires to selected POTWs. Based on the results of that survey, NRC will identify approximately 300 POTWs from which samples of sewer sludge/ash will be taken and analyzed. Results of the full survey will be published for use by Federal agencies, States, POTWs, and local POTW officials.

Submit, by March 7, 1997, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
