### III. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before August 25, 1997. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

### IV. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in Federal Register (56 FR 29362) June 26, 1991; [FRL 3846-4]. Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

**FOR FURTHER INFORMATION CONTACT:** By mail: Dennis H. Edwards, Jr., Product Manager (PM) 19, Registration Division (7505C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number and e-mail address: Rm. 207, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-6386; e-mail: edwards.dennis@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** EPA has received a pesticide petition (PP) 6F4765 pursuant to section 408(d) of the Federal Food, Drug and Cosmetic Act, as amended, 21 U.S.C. 346a(d), by the Food Quality Protection Act of 1996 (FQPA) (Pub. L. 104-170, 110 Stat. 1489) from Bayer Corporation ("Bayer"), 8400 Hawthorn Rd., P.O. Box 4913, Kansas City, MO 64120-0013 proposing to amend 40 CFR 180.472 by establishing tolerances for inadvertent or indirect residues of the insecticide, imidacloprid: 1-[(6-chloro-3-pyridinyl)methyl]-N-nitro-2-imidazolidinimine and its metabolites containing the 6-chloro-pyridinyl moiety in or on cereal grain [grain 0.05 parts per million (ppm), forage (2.0 ppm), stover (0.3 ppm), hay (6.0 ppm), and straw (3.0 ppm)], sweet corn (0.05 ppm), legume vegetables (0.3 ppm) [and foliage thereof (2.5 ppm)], and safflower seed (0.05 ppm). The nature of the imidacloprid residue in plants and livestock is adequately understood. The analytical method for determining residues is a common moiety method for imidacloprid and its metabolites containing the 6-chloro-pyridinyl moiety using oxidation, derivatization, and analysis by capillary gas chromatography with a mass-selective detector. These tolerances would allow for a 1-month plant back interval for these crops following normal application of imidacloprid-containing products.

EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

As required by section 408(d) of the FFDCA, as recently amended by the FQPA, Bayer Corporation included in
