BILLING CODE 4310-02-P

Bureau of Land Management

[WY-930-1610-00]

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability of the Decision Record and Finding of No Significant Impact for the management of Big Cedar Ridge Fossil Plant Area in Washakie County, Wyoming.

SUMMARY: The decision record for the Big Cedar Ridge Fossil Plant Area outlines management for 1,550 acres in the Bighorn Basin Resource Area of the Worland District, amends the 1988 Resource Management Plan (RMP) for the former Washakie Resource Area, and designates an Area of Critical Environmental Concern (ACEC) on 260 acres, where fossil plants are concentrated.

The general management objective and emphasis within the Big Cedar Ridge Fossil Plant Area will be for scientific research, public education, recreation, and protection of the fossil resources.

The BLM will also pursue withdrawal of the public lands from entry under the mining laws to prohibit the staking of mining claims on 260 acres of BLM-administered public lands where fossils are concentrated. This action constitutes an amendment to the Washakie RMP.

In addition, an ACEC is designated on the same 260 acres. This ACEC designation constitutes an amendment to the Washakie RMP and will take

effect at the end of a 60-day public comment period.

EFFECTIVE DATES: Comments on the Big Cedar Ridge Fossil Plant proposed ACEC should be sent to the BLM's Worland District Office at P.O. Box 119, Worland, Wyoming 82401, within 60 days of the publication date of this notice.

FOR FURTHER INFORMATION CONTACT: Margy Tidemann, Editorial Assistant, Bureau of Land Management, at the address cited above or at 307-347-5100.

SUPPLEMENTARY INFORMATION: The fossil concentration areas at Big Cedar Ridge, discovered in 1990 by Dr. Scott Wing of the Smithsonian Institution, meet the relevance and importance criteria for ACEC designation. The plants form a complete late Cretaceous-age vegetative community that was buried in-place by volcanic ash about 72 million years ago. The flora, consisting of flowering plants, ferns, palms, and conifer trees, preserves a true instant in time, highlighting relationships between the ancient landscape and its vegetation. Paleobotanists have already been able to establish plant, soil, and topographic associations. This is possibly the oldest site in the world where such associations are seen. Excavations in 1992 resulted in the identification of over 100 new plant species. Scientists have also been able to distinguish at least five different types of insect predation which took place on the flora of Big Cedar Ridge.

As described in the decision record for the area, a detailed activity or implementation plan will be developed for the 260-acre fossil concentration areas. These areas will be routinely monitored and any needed management changes will be made to insure that resource damage does not occur.

The 260-acre fossil concentration areas will be managed primarily for research, public education, and fossil interpretation, as well as hobby (noncommercial) collection of fossils.

Surface-disturbing activities that are not related to research, public education, interpretation, or hobby collection of fossils will be prohibited in the 260-acre fossil concentration areas.

As required, further environmental analyses will be conducted on any future site-specific activity or implementation planning to be done in the Big Cedar Ridge area. This would include opportunities for public comment.

Any detailed activity planning that may be conducted in the Big Cedar Ridge area will consider needs for site-specific mitigation of surface-disturbing activities for things like locating trails,

roads, exhibits, and facilities to enhance public education.

Dated: February 19, 1997.

Alan R. Pierson,

State Director.

Public Land Order No. 7248; Revocation of Secretarial Order Dated April 20, 1922; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes a Secretarial Order dated April 20, 1922, in its entirety as to the remaining 489.56 acres of lands withdrawn for the Bureau of Land Management's Power Site Classification No. 29. The lands are no longer needed for this purpose, and the revocation is necessary to facilitate a pending land exchange under Section 206 of the Federal Land Policy and Management Act of 1976. Of the 489.56 acres being revoked, 329.56 acres are temporarily closed to surface entry and mining by a pending land exchange. These lands have been and will continue to be open to mineral leasing. The remaining 160 acres were conveyed out of public ownership in 1926. Since they were not conveyed subject to Section 24 of the Federal Power Act, the revocation insofar as it affects the 160 acres is a record clearing action only.

EFFECTIVE DATE: June 3, 1997.

FOR FURTHER INFORMATION CONTACT: Kathy Gary, BLM California State Office (CA-931.5), 2135 Butano Drive, Sacramento, California 95825; 916-979-2858.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and

Management Act of 1976, 43 U.S.C. 1714 (1988), is it ordered as follows:

1. The Secretarial Order dated April 20, 1922, which established Power Site Classification No. 29, is hereby revoked in its entirety as to the following described lands:

Mount Diablo Meridian

- (a) Pending Exchange Lands.
T. 31 N., R. 8 W.,
Sec. 4, lot 13 (originally described as SW $\frac{1}{4}$ SW $\frac{1}{4}$);
Sec. 8, lots 1 and 4, and NW $\frac{1}{4}$ NE $\frac{1}{4}$.
T. 32 N., R. 8 W.,
Sec. 30, lots 9, 10, 11, 16, and 17 (originally described as SE $\frac{1}{4}$ NE $\frac{1}{4}$ and SE $\frac{1}{4}$).
- (b) Record Clearing Land.
T. 32 N., R. 8 W.,
Sec. 32, NW $\frac{1}{4}$.
The areas described aggregate 489.56 acres in Trinity county.

2. At 10 a.m. on June 3, 1997 the lands described in paragraph 1(a) will be available for exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716 (1988).

3. The land described in paragraph 1(b) was conveyed out of public ownership in 1926. Therefore, the revocation insofar as it affects that land is a record clearing action only.

4. The lands described in paragraph 1(a) have been open to mining under the provisions of the Mining Claims Rights Restoration Act of 1955, 30 U.S.C. 621 (1988). However, since this act applies only to lands withdrawn for power purposes, the provisions of the act are no longer applicable. These lands have been and continue to be open to mineral leasing.

5. The State of California, with respect to the lands described in paragraph 1(a), has a preference right for public highway rights-of-ways or material sites for a period of 90 days from the date of publication of this order, and any location, entry, selection, or subsequent patent shall be subject to any rights granted the State as provided by the Act of June 10, 1920, Section 24, as amended, 16 U.S.C. 818 (1988).
