

maintenance area that contains a 100-square-meter hardstand.

The proposed G.V. (Sonny) Montgomery Range supports collective training at the platoon and lower levels. Units using the proposed range complex will include tanks, infantry/cavalry fighting vehicles and attack helicopters. This advanced training develops collective skills at the small unit level. It requires sections and platoons to employ moving and stationary target engagement techniques with all weapon systems during daylight and periods of limited visibility.

The lack of an MPRC-H at Camp Shelby was noted in the Department of Defense response to a Government Accounting Office report, "Peacetime Training Did Not Adequately Prepare Combat Brigades for Gulf War," dated September 1991. The Army National Guard considers construction of this range complex vital to the training and combat readiness of the armor and mechanized infantry units that train at Camp Shelby. The proposed range complex will enhance the training capabilities and efficiencies at Camp Shelby by providing for simultaneous utilization of tank gunnery ranges and tank maneuver areas. It will permit more tanks to complete fire requirements simultaneously, leading to more efficient and effective utilization of training facilities at Camp Shelby.

A 45-day public review and comment period was provided for the Draft Supplemental Environmental Impact Statement (DSEIS). Two public meetings were conducted in Hattiesburg, Mississippi, on the DSEIS after the Notice of Availability was published. After all the comments were compiled and reviewed, responses were prepared to all relevant environmental issues that were raised. These responses to comments and/or any new pertinent information were incorporated into the DSEIS to constitute the FSEIS.

DATES: The public review period for this FEIS ends 30 days after the date of publication of the Environmental Protection Agency's Notice of Availability in the **Federal Register**. After the 30-day waiting period on the FSEIS has ended, a Record of Decision will be published.

ADDRESSES: Copies of the FSEIS will be mailed to individuals who participated in the public scoping process. Copies will also be sent to Federal state, regional, and local agencies; interested organizations and agencies; and public libraries. Individuals not currently on the mailing list may obtain a copy by request.

BILLING CODE 5000-04-F

DEPARTMENT OF ENERGY

Floodplain and Wetlands Involvement Notification for the A-01 Outfall Constructed Wetlands Project at the Savannah River Site (SRS)

AGENCY: Department of Energy (DOE).

ACTION: Notice of floodplain and wetlands involvement.

SUMMARY: DOE proposes to construct and operate an artificial wetlands to treat effluent from the A-01 outfall located on SRS. The A-01 effluent has consistently not met proposed outfall limits which will become effective on October 1, 1999. DOE needs to reduce the copper and chronic toxicity levels in the effluent to ensure compliance when these proposed outfall limits go into effect. It has been determined that a subsurface flow wetlands and an associated detention basin would adequately treat the effluent to meet the new discharge limits. As part of the proposed project activities, a new outfall structure would be constructed within the 100-year floodplain and wetlands associated with Tim's Branch, the headwaters stream into which the treated effluent would be discharged. These activities would necessitate temporary construction access, construction of the new outfall structure, and placement of riprap material in this drainage corridor. In accordance with title 10 CFR part 1022, DOE will prepare a floodplain and wetlands assessment and will perform this proposed action in a manner so as to avoid or minimize potential harm to or within the affected floodplain or wetlands.

DATES: Comments on the proposed action due on or before March 18, 1998.

ADDRESSES: Comments regarding this assessment should be addressed to Andrew R. Grainger, National Environmental Policy Act (NEPA) Compliance Officer, Savannah River Operations Office, Building 773-42A, Room 212, Aiken, South Carolina 29808. The fax/phone number is (800) 881-7292. The e-mail address is nepa@srs.gov.
