Notice of Availability of a Draft Recovery Plan for the Rio Grande Silvery Minnow (*Hybognathus amarus*) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a draft recovery plan for the Rio Grande silvery minnow, (*Hybognathus amarus*). The species currently occurs in only 10 percent of the historic range, 180 miles of the Rio Grande in New Mexico between Cochiti Lake and Elephant Butte Reservoir. Historically, the species occurred from Espanola in north central New Mexico downstream to the Gulf of Mexico on the main stem of the Rio Grande, and from Santa Rosa, New Mexico to the confluence with the Rio Grande in the Pecos River. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before April 2, 1998 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may examine a copy by contacting Field Supervisor, U.S. Fish and Wildlife Service, New Mexico Ecological Services Field Office, 2105 Osuna Road NE, Albuquerque, New Mexico, 87113, telephone (505) 761-4525. Written comments and materials regarding the plan should also be addressed to the same address above. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the same address.

FOR FURTHER INFORMATION CONTACT: Jeffery C. Whitney, U.S. Fish and Wildlife Service (see ADDRESSES) at (505) 761-4525.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the native species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for down listing or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised Recovery Plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The silvery minnow was listed as endangered on July 18, 1994. This Recovery Plan is the product of considerable biological and hydrological data developed by a team of scientists, agency personnel, stakeholders from the management community, Native American community and conservation organizations. It includes scientific information about the species and provides management procedures for protecting its habitat and expanding its range and abundance to the extent that no natural or man-caused disturbance will result in irrevocable losses.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(F).

AGENCY: Bureau of Land Management; Interior.

ACTION: Notice—bat hibernation sites (*hibernacula*) closure.

SUMMARY: Pursuant to 43 CFR 8364.1, eleven caves in the Upper Snake River Districts are identified as bat hibernation sites (*hibernacula*) are seasonally closed to entry. With the exception of approved research, essential search and rescue, or other emergency or administrative operations for cave resources protection, eleven caves containing hibernation sites are closed during the hibernation season to all visitation, from October 15 to May 1.

Affected caves are listed below:

Bobcat Cave
Kids Cave
Owl Cave
Chalk Cave
Giant Arch Cave
Gypsum Cave
Little Arch Cave
Pot O' Gold Cave
Twin Cave
Will's Cave
The One That Goes Cave

The purpose of the closure is to protect bat species and their habitat during the critical hibernation period. Any person who fails to comply with this closure and restriction order, under 43 CFR 8364.1, may be subject to the penalties provided in regulations at 43 CFR 8360.0-7; a fine not to exceed \$1,000 and/or imprisonment not to exceed 12 months.

DATES: This action is effective December 18, 1997.

ADDRESSES: The Federal Cave Resources Protection Act of 1988 prohibits disclosure of cave locations. Information pertaining to the above closure is available at the Shoshone Resource Area in Shoshone, Idaho, and the Idaho Falls District Office in Idaho Falls, Idaho.

FOR FURTHER INFORMATION CONTACT:

Paula Call, BLM Shoshone Resource Area, P.O. Box 2-B, Shoshone Idaho 83352, telephone (208) 886-7254, or Joe Lowe, BLM Idaho Falls District Office, 1405 Hollipark Drive, Idaho Falls, Idaho 83401, telephone (208) 524-7558.

SUPPLEMENTARY INFORMATION: Certain caves in the Upper Snake River Districts serve as critical winter habitat for bats because they provide a narrow yet optimum range of temperature and other microclimatical variables required for successful hibernation. Research has indicated that all bat species are extremely susceptible and sensitive to human disturbance during hibernation, and that recreational caving trips during the hibernation season are detrimental to the survival of bat species.

Dated: December 19, 1997.

Shoshone Resource Area Manager.

Competitive events and commercial uses of desert have increased tremendously since the original Management Framework Plan was completed in 1982. Plan goals include (1) Managing the varied resources while providing for a wide range of dispersed recreational activities and opportunities in a prudent manner; (2) Providing economic opportunities
