[Project No. 8825-007]

Neshkoro Power Associates; Notice of
Availability of Environmental
Assessment

February 27, 1998.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order 486, 52 F.R. 47897), the Commission's Office of Hydropower Licensing has reviewed an exemption surrender application for the Morley Dam Project, No. 8825-007. The Morley Dam Project is located on the Little Muskegon River in Mescosta County, Michigan. The EA finds that approving the application would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Commission's Reference and Information Center, Room 2A, 888 First Street, N.E., Washington, D.C. 20426. Please submit any comments within 30 days from the date of this notice. Any comments, conclusions, or recommendations that draw upon studies, reports, or other working papers of substance should be supported by appropriate documentation.

Comments should be addressed to David P. Boergers, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426. Please affix Project No. 8825-007 to all comments. For further information, please contact the project manager, Ms. Hillary Berlin, at (202) 219-0038.

David P. Boergers,
Acting Secretary.

SUPPLEMENTARY INFORMATION:

Producers of Pesticides, Recordkeeping Requirements for Producers of Pesticides Under Section 8 of the Federal Insecticide, Fungicide, and Rodenticide Act as amended (FIFRA)

Affected entities: Entities potentially affected by this action are those which produce pesticides.

Title: Recordkeeping Requirements for Producers of Pesticides under section 8 of the Federal Insecticide, Fungicide, and Rodenticide Act as amended (FIFRA). OMB Control Number 2070-0028, expires 8/31/98.

Abstract: Section 8 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) states that the Administrator of the Environmental Protection Agency may prescribe regulations requiring producers, registrants and applicants for registration to maintain such records with respect to their operations and the effective enforcement of this Act as the Administrator determines are necessary for the effective enforcement of FIFRA and to make such records available for inspection and copying as specified in the statute. The regulations at 40 CFR Part 169 (Books and Records of Pesticide Production and Distribution)

specify the following records that producers must keep and the disposition of those records: production data for pesticides, devices, or active ingredients (including pesticides produced pursuant to an experimental use permit); receipt by the producer of pesticides, devices, or active ingredients used in producing pesticides; delivery, moving, or holding of pesticides; inventory; domestic advertising for restricted use pesticides; guarantees; exports; disposal; human testing; and tolerance petitions. Additionally, section 8 gives the Agency inspectional authority to monitor the validity of research data (including raw data), including data developed in accordance with Good Laboratory Practice Standards, and used to support pesticide registration. The EPA or States/Indian Tribes operating under Cooperative Enforcement Agreements make use of the records required by section 8 through periodically inspecting them to help determine FIFRA compliance of those subject to the provisions of the Act. In addition, producers themselves make use of such records in order to comply with reporting requirements under FIFRA section 7 and 40 CFR Part 167.85. (Those reporting requirements, concerning the types and amounts of pesticides produced annually at each producing site, are addressed in the ICR entitled "Pesticide Report for Pesticide-Producing Establishments," OMB Docket Number 2000-0029.)

Since most of the records required to be maintained are likely to be collected and maintained in the course of good business practice, the records are generally stored on site at either the establishment producing the pesticide or at the place of business of the person holding the registration. However, the registrant may decide to transfer records relating to disposal of pesticides and human testing to EPA for storage because of a twenty year retention requirement for the records. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the
